

MANDALA PUTRA BARUNA NUSANTARA

3 D M O D E L L I N G

PROFILE

I'm a 3D Modeller with a deep passion for the world of digital creation. While I'm skilled across various areas of 3D, my strongest expertise lies in modeling—bringing ideas to life with precision, detail, and style. I draw inspiration from diverse sources, blending creativity with technical skill to craft unique, high-quality assets. Always eager to learn and explore new techniques, I strive to push my work beyond limits and deliver bold, original creations to every project.

EDUCATION

Raden Umar Said Vocational School
3D Animation Major

SKILL

Technical

- Mastering Blender, Autodesk Maya, and Substance Painter software
- Understanding hard surface modelling
- Use of References and Proportion Study for shape accuracy
- UV Mapping and Texturing

Non Technical

- Problem Solving
- Time Management
- Adaptability
- Detail Oriente
- Quick Learning
- Creativity

EXPERIENCE

Ranggawarsita - Reachout Team 3D Animation Competition

Responsible for modeling, texturing, lighting, and rendering in the 3D animation production team. Develop 3D hard surface models with realistic details and proportions according to project requirements. Optimize production workflow so that the modeling stage is completed faster than the specified deadline.

Overtime - Grextion Animation Team Project (2026)

Responsible for creating 3D models with high poly to midpoly levels for animated film production needs. Develop 3D assets with a semi-stylized visual style. Perform texturing processes to maintain consistency of color, material, and the overall mood of the project.

Internship 3D Modeler Props and Environment Lys Animation Studio

Worked as a 3D Modeler (Props & Environment) on a short 3D animated film presented at Balinimation Fest 2026, focusing on environment storytelling and asset integration within the final scenes. Collaborated closely with a multidisciplinary team, coordinating asset workflows and adapting to feedback to support a smooth production process.
