

Sir.Cò

I am a passionate Architecture professional with a solid background in Architectural Visualization (archviz) and space design.

I aim to bring architectural ideas and concepts to life through engaging visual presentations.

I aim to bring architectural ideas and concepts to life through engaging visual presentations.

I am a civil engineer, but my academic and professional journey has always been influenced by artistic performances, thanks to street art shows performed throughout Italy.

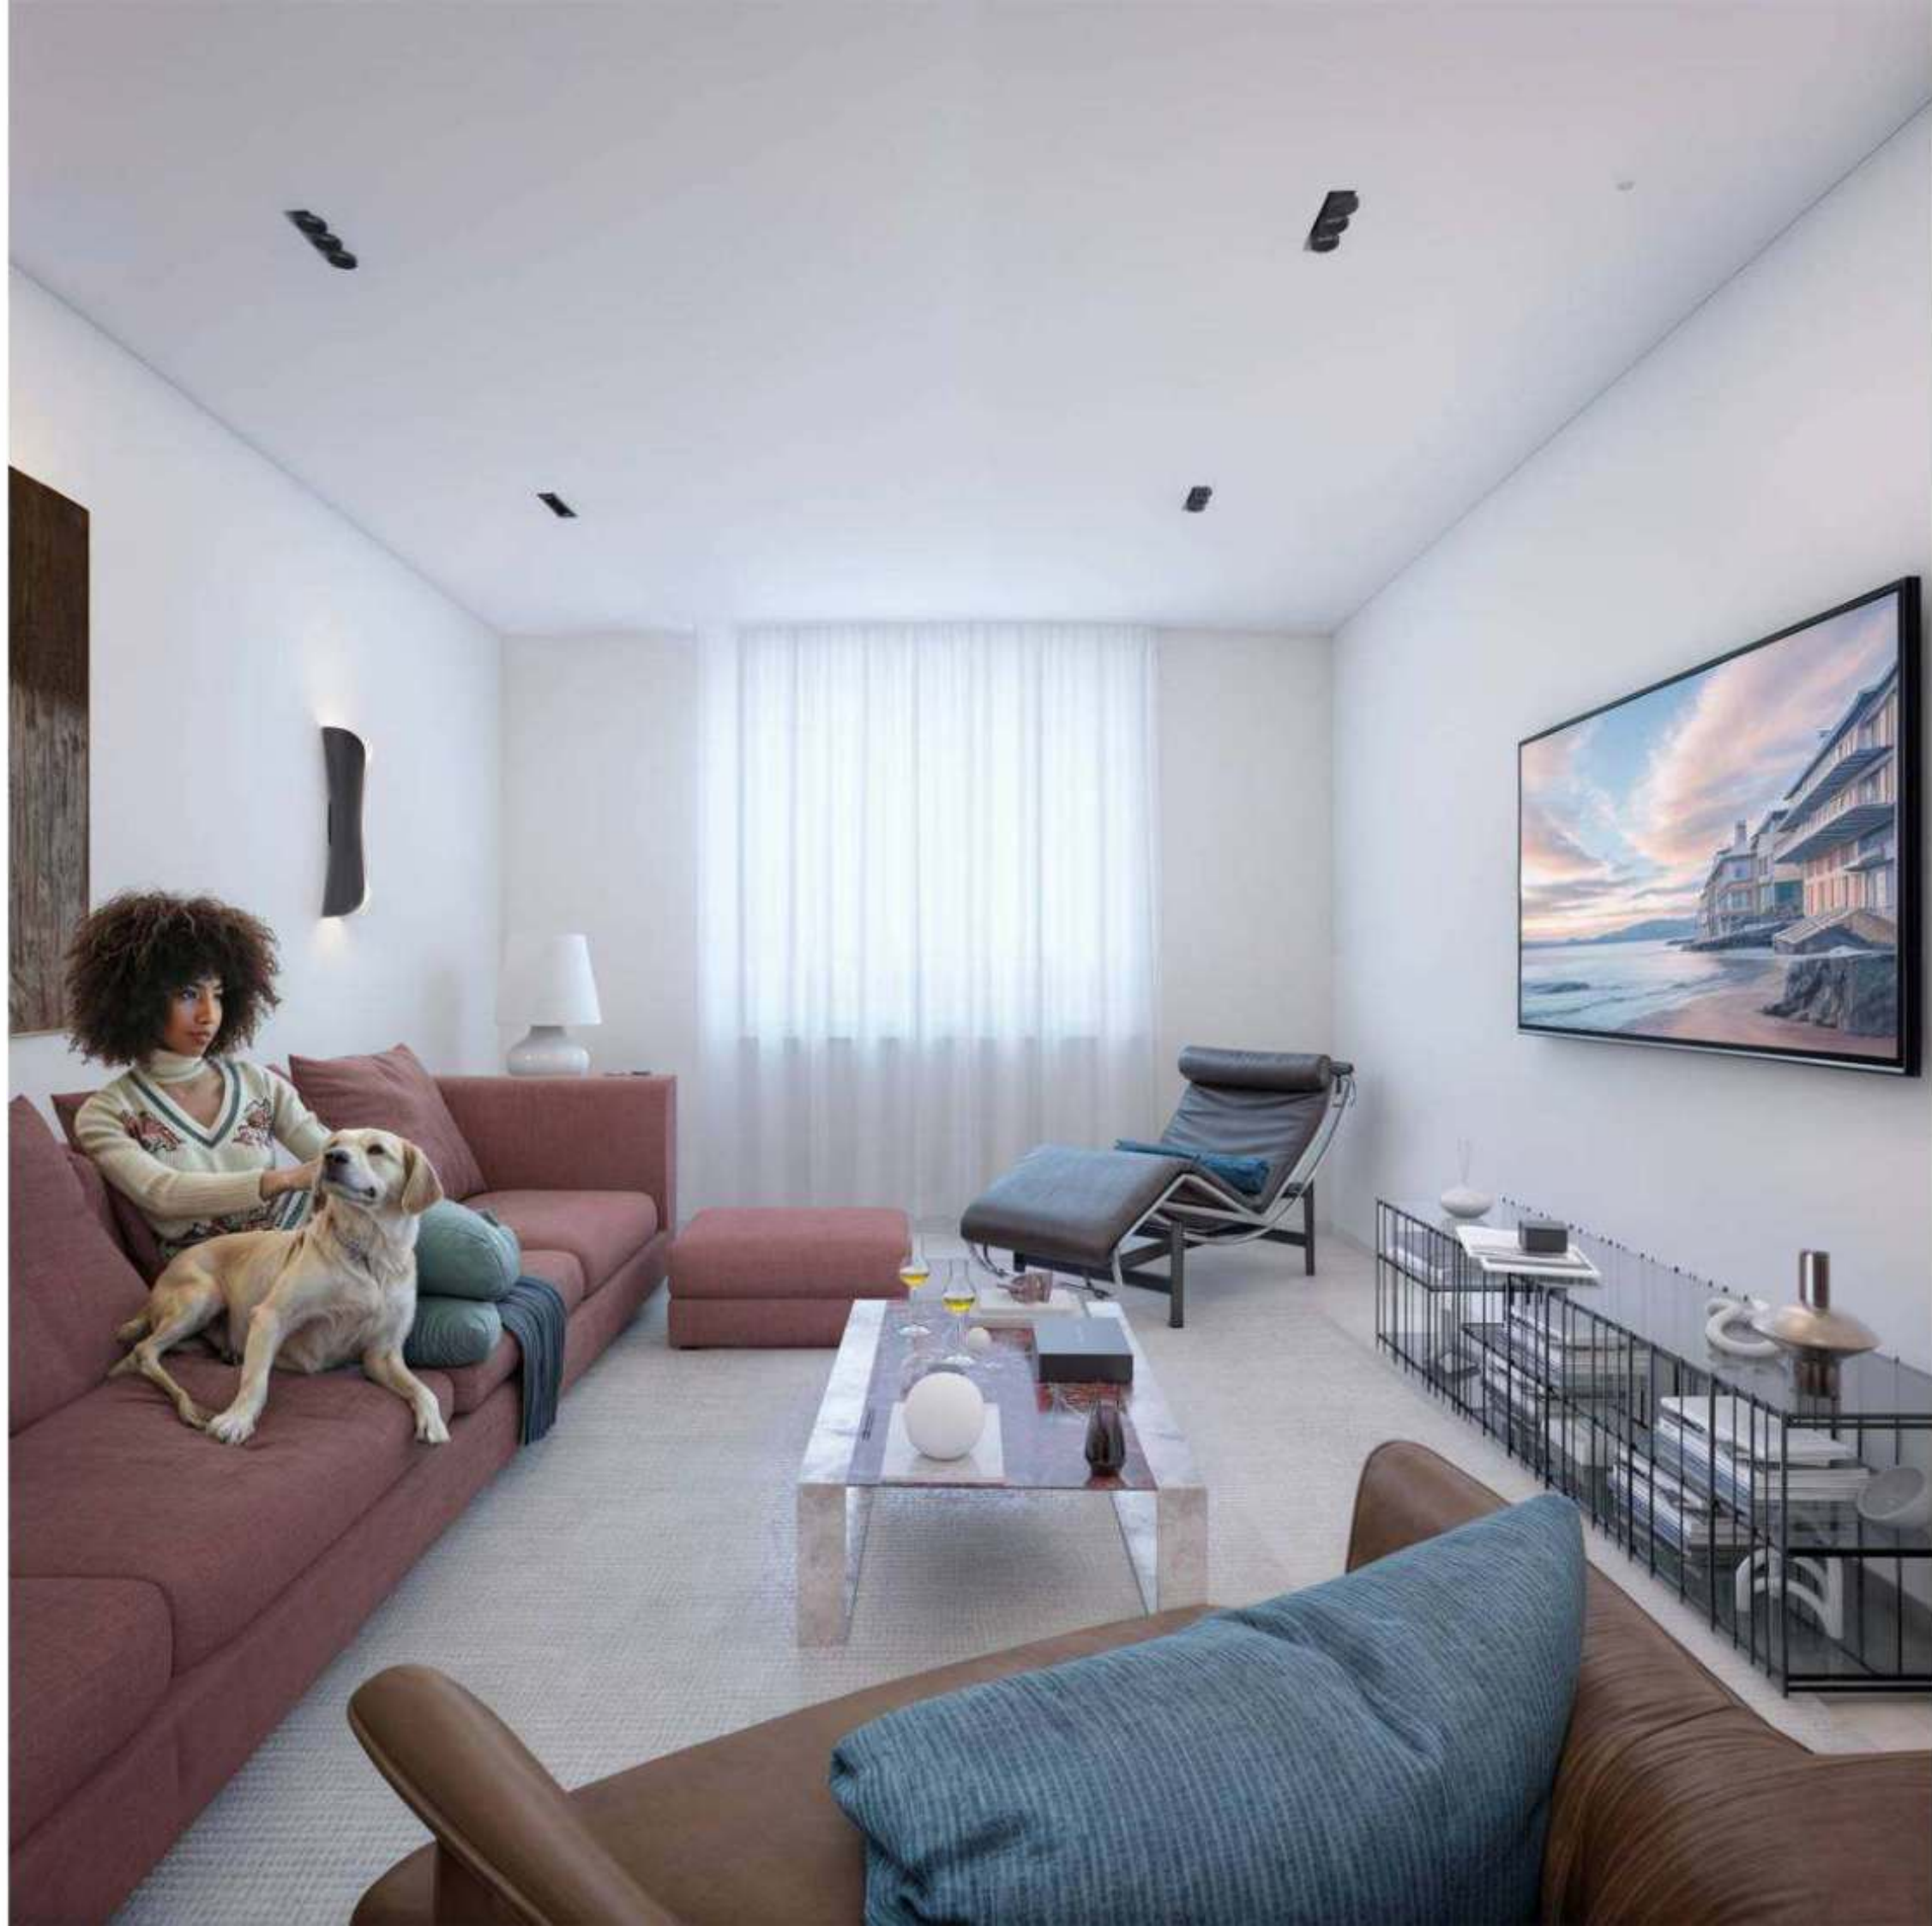

I am in a constant state of exploration and evolution, driven by a commitment to continuous improvement. I am excited about bringing my passion for architectural visualization and design to your studio, contributing to stimulating projects, and collaborating with talented professionals.

Thank you for your attention. I am available to discuss further how my skills can enrich your team.
