Profile

Creative Technologist specializing in AI-driven experiences, XR development, and interactive storytelling. Delivered 5+ projects from concept to deployment, combining technical expertise in Unity, Unreal Engine, and real-time rendering with conceptual design thinking.

Experience

- Creative Technologist**, Independent Projects & Freelance, London Mar 2020 – Present
- UNSEEN (2025) – AI-driven emotional visualization platform translating text into real-time 3D spatial landscapes. Integrated sentiment analysis (GPT-4, Hugging Face) with Unity VFX Graph rendering, creating 4 distinct emotional environments through custom particle systems and procedural materials
 - Shipped 5+ XR&VR titles including 'Call of Death' AR game with hand tracking & AI at 90fps on Quest
 - Built NFT series Vollo, reaching 10K+ collectors and awarded Pepe Coin Concept Art (2024)
- VFX / 3D Animation Designer (Intern)**, Kwai Technology, Shanghai Oct 2022 – Sep 2023
- Produced 10+ brand campaigns, handling 3D modeling, animation, and rendering
 - Designed interactive trophy installation for Brazilian creator (1M+ followers), showcased at event with 100K+ live viewers
- IP Character Designer (Intern)**, Pop Mart, Beijing Mar 2022 – Sep 2022
- Designed 3+ collectible IP characters and campaign visuals, strengthening brand recognition

Projects

- Audio Experience: Wildfire Escape (2025)** Link to project
- Audio-driven VR escape simulation using spatial sound for navigation and immersion in Unity
- Call of Death (2024-2025)** Link to project
- AR interactive shooting game on Meta Quest with hand-tracking, AI opponents, and particle VFX in Unity
- Quantum Discord (2024-2025)** Link to project
- Narrative-driven indie game exploring discord and harmony through environmental storytelling in Unity
- Who Am I (2024)** Link to project
- Interactive narrative exploring identity through dual-protagonist gameplay in UE5
- The Vanishing Memory (2024)** Link to project
- Speculative experience exploring civilizational memory through dual-protagonist gameplay in UE5
- Halloween Magic AR Filter (2024)**
- AR experience for Instagram with custom 3D models, deployed through Lens Studio

Core Skills

Creative & Conceptual: Interactive storytelling, Emotion-driven design, AI + Art integration, XR experience design
Technical:: Unity, Unreal Engine 5, WebGL, Meta Quest SDK, C#, Blueprint
3D Art & Tools: Blender, Substance Painter, ZBrush, TouchDesigner, After Effects, Photoshop, Illustrator, Figma

Education

Goldsmiths, University of London, MA/MSc Virtual and Augmented Reality Sep 2024 – Sep 2025
Shanghai Business School, BA Visual Communication Design Sep 2019 – Jun 2023

Awards & Recognition

Pepe Coin NFT Concept Art Award – selected from 1000+ submissions | 2024
Collaborated with 10+ partners across gaming, advertising, and education
MA/MSc Distinction Graduate – Goldsmiths, University of London | 2025
