ACHIEVEMENTS

5 Award 

9 Innovation project of laptop 

36 Intellectual Property Achievements

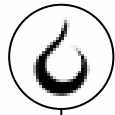

Several IF laptops concept Awards during my work :

- 2022 iF Design Award,Métis laptop: Designing the reflection screen by incorporating polarized film sheets.
- 2022 & 2023 IF Design Finalist_Hypervision & Atlas laptop:
One laptop have a foldable screen, the other laptop design with stand-up capabilities.
- COMPAL Innovation Award_ GOLD Award: Design a wireless Charge laptop.
- COMPAL Patent Award: Design a shared headphones audio.

Laptop Intellectual property technology including :

- Optimized internal structure enables screen flipping for versatile views.
- Enhanced user experience with dynamic, touch-sensitive screens.
- Thermal solutions like graphene improve heat transfer and performance.

EXPERIENCE

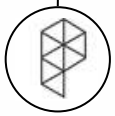

Barbican LIGHT PRODUCT DESIGNER | 2024 AUG - 2025 NOV , FORT ERIE CANADA

- Rendering 3D models into realistic images using Stable Diffusion, ChatGPT, and ComfyUI, aiming to provide a faster and smarter method for creating interior and 3D visuals for client presentations.
- Use Solid Edge to build the 3D lighting model and create the line drawing.
- Using AGI 32 and Photopia, analyze the lighting sources and configure fixture information within a specific room, based on the lumen output provided to customers.

COMPAL INDUSTRIAL ENGINEER | 2019 SEP - 2023 SEP , TAIPEI TAIWAN

- Designed and developed the 3D models of the latest laptop models and appearance utilizing Creo and Keyshot, will produce 2000 of models for references.
- Showing the 3D models to clients such as **HP**, **DELL**, **Asus**, and **Acer** through presentations prepared with Tone, Canva & ChatGPT & Midjourney Generative AI. Adjusting concept models to fit the client's design language following feedback from the stockholders.
- Collaborating with mechanical engineers for various concepts discussions, research, and ideas to explore and improve on existing designs. Closely critiquing and refining production models with manufacturers at their factories.

Piindesign INDUSTRIAL DESIGNER | 2018 AUG - 2019 AUG , TAIPEI TAIWAN

- Produced small-batch tech products for startups, assisted companies to produce multiple designs of humidifiers, microphone, tab machine, filter equipment.
- Created UI & UX , web, and creat the front-end of websites for clients company.
- Operated and 3D printed PLA models for refining product concepts.

SKILLS

- | | | |
|--------------------|----------------------------|---------------|
| • Creo Parametric | • Adobe Photoshop | • AutoCAD |
| • Keyshot | • Adobe After Effects | • Rhino |
| • Revit | • Adobe Illustrator | • SolidWorks |
| • Photopia& AGI 32 | • Generative AI/Midjourney | • Grasshopper |

EDUCATION

GREYSTON COLLEGE

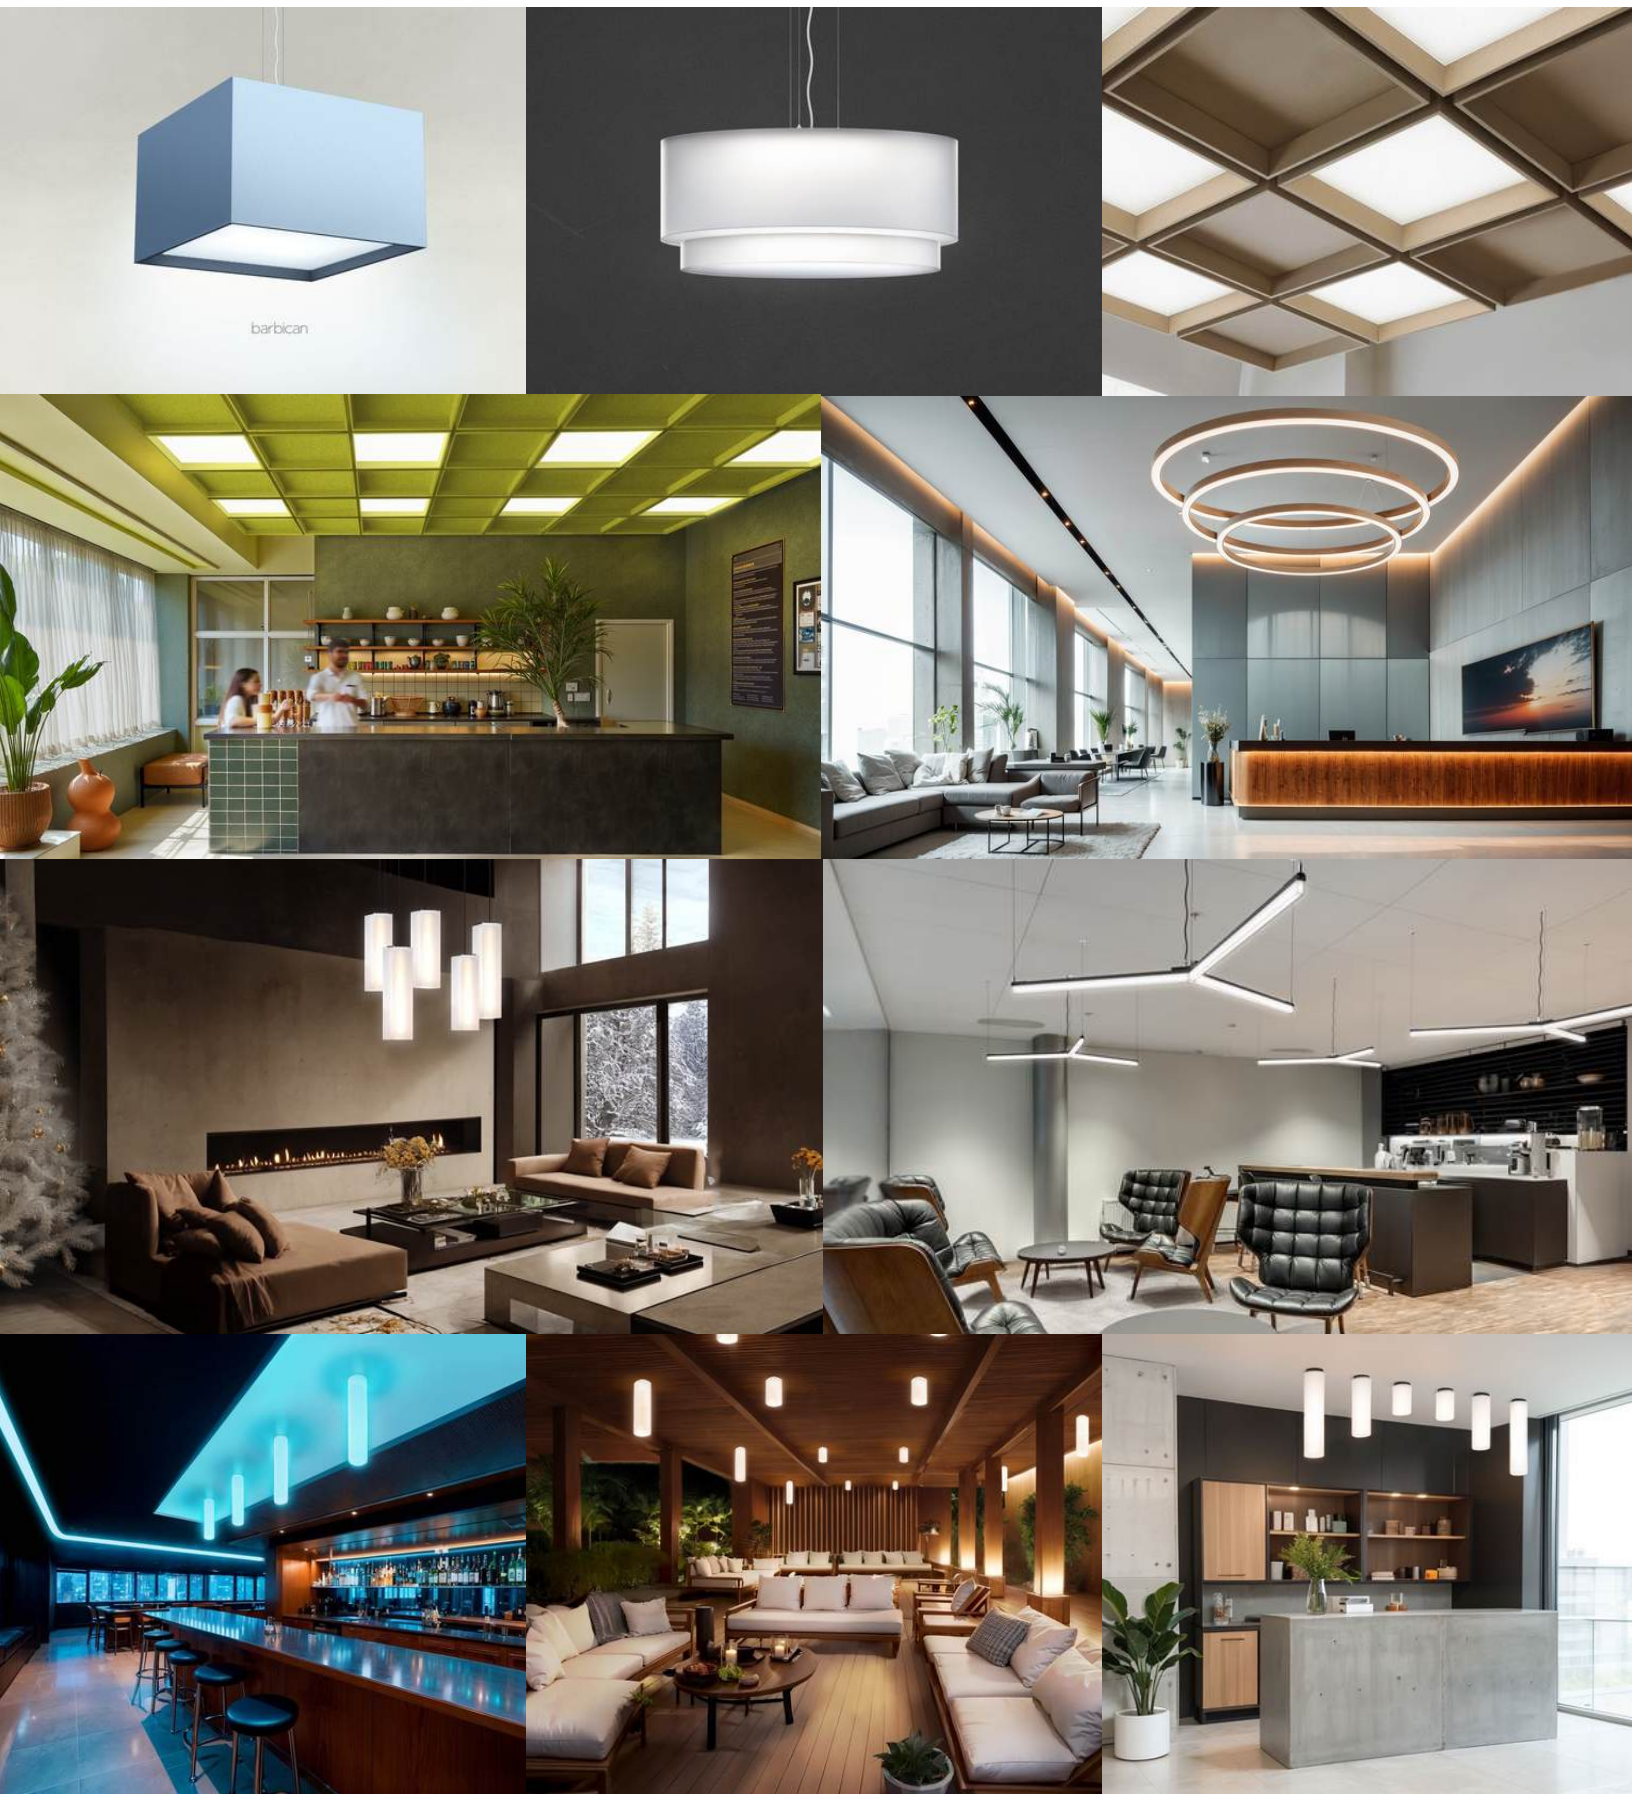

INTERNATIONAL BUSINESS
| 2023 JULY - 2024 MAY CANADA

TATUNG

INDUSTRIAL DESIGN MAJOR
| 2013 SEP - 2018 JULY TAIWAN

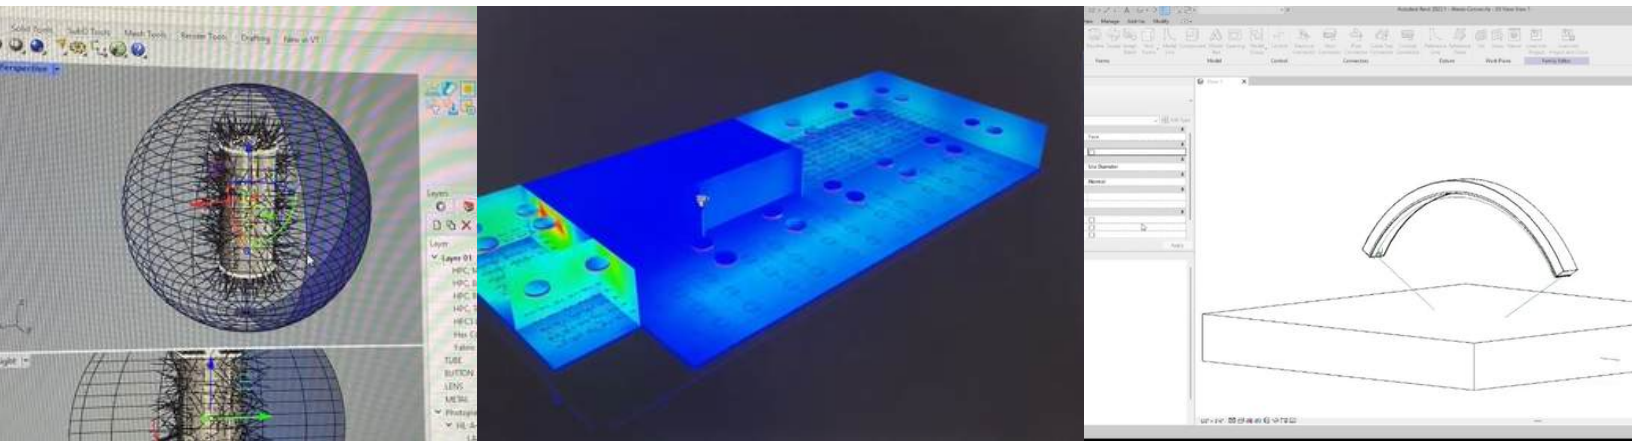

Lighting Product Projects

Product projects

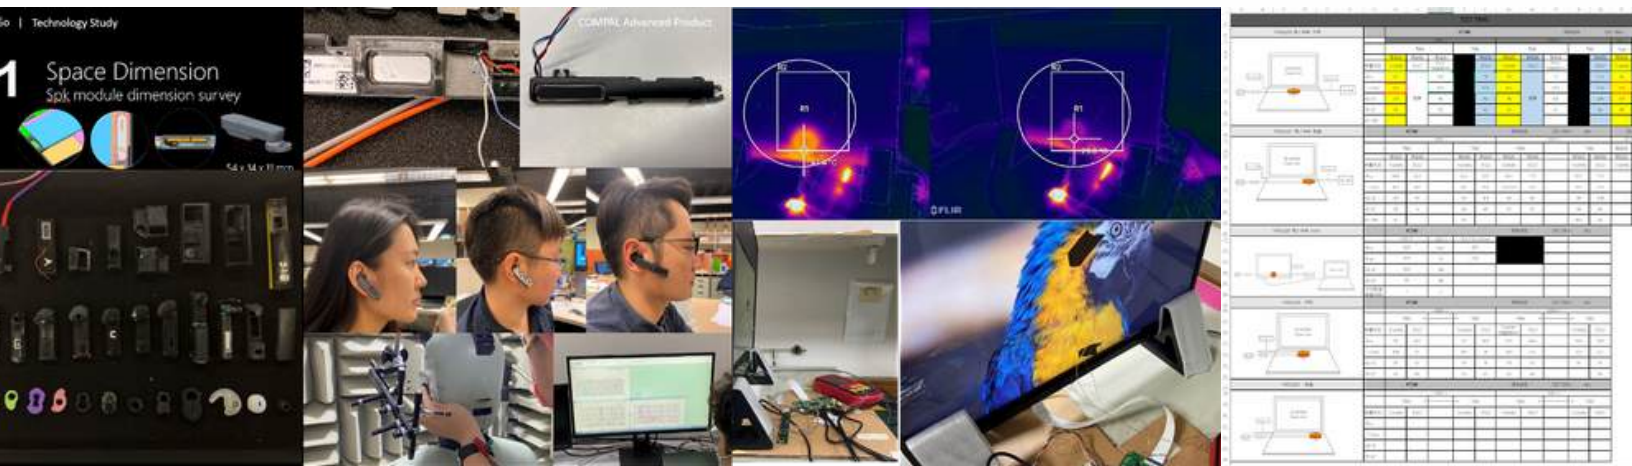

Photopia & AGI 32 & Revit

Research Product Function

Collaborating with mechanical engineers to research production possibilities involves discussions within the organization and visits to factories to work closely with manufacturers on refining production models.

Concept Video Presentation

Edit the 3D rendering video using Adobe After Effects or ai tools to create a video presentation for the clients.
