PROFILE

I am a developer with over 6 years of experience building interactive games and mobile applications using **Unity, Unreal Engine, AR/VR technologies, 2D and 3D Modelling**. My focus is on creating visually engaging and technically optimized experiences across platforms, including **mobile, PC, and XR devices**. I specialize in gameplay systems, mobile integrations, and real-time 3D environments, balancing design creativity with technical execution. I have also guided small development teams, managed client collaborations, and delivered production-ready projects from concept to release.

SKILLS

Programming & Scripting

- C#
- C++
- Python
- JavaScript
- TypeScript
- SQL
- GraphQL

● ● ● ● ●

Mobile & Cross-Platform Development

- iOS
- Android
- React Native
- Flutter
- PWA
- API Integration
- Payment Systems

● ● ● ● ●

Design & Collaboration

- UI/UX Design
- Level Design
- Prototyping
- Agile/Scrum
- Git
- Code Reviews
- Technical Documentation

● ● ● ● ●

Game & XR Development

- Unity
- Unreal Engine
- ARKit
- ARCore
- Vuforia
- AR Foundation
- Three.js
- BlueprintsGameplay Programming
- AI & Physics Systems
- Shader Creation
- Lighting & Optimization
- 3D Modelling

● ● ● ● ●

Backend & Cloud

- Firebase
- AWS
- Azure
- REST APIs
- GraphQL APIs
- PostgreSQL
- MongoDB

● ● ● ● ●

Cloud & DevOps

- AWS
- Azure
- GCP
- Docker
- Kubernetes
- CI/CD
- Pipelines
- Nginx
- GitHub Actions

● ● ● ● ●

PROFESSIONAL EXPERIENCE

Evolve Innovative Solutions

12/2022 – 09/2025

Game and Mobile Developer | Unity & Unreal Specialist

- Designed and developed interactive **mobile and XR applications** using Unity and Unreal Engine for clients in education, retail, and entertainment.
- Built **cross-platform systems** integrating mobile gameplay with AR and VR components for immersive experiences.
- Delivered **VR showcases** at international workshops hosted by Unity and Epic Games in Singapore, demonstrating advanced rendering, physics, and real-time interactivity.
- Led a **team of 5 developers and designers**, managing sprints, reviews, and deployment pipelines for AR/VR projects.
- Created and optimized **50+ interactive prototypes**, including educational simulations, AR visualizations, and multiplayer concepts.
- Directed the technical development of a **VR tower defense game**, managing environment lighting, AI behavior, performance tuning, and publishing on Steam.
- Developed the **“Legend of Maula Jatt VR Experience”**, collaborating with filmmakers to merge cinematic assets with real-time VR gameplay. Oversaw animation capture pipelines and scene optimization for high-end headsets.
- Supported **mobile app builds** for iOS and Android, ensuring consistent performance across devices.

Cresset Technologies

05/2020 – 11/2022

Mobile and AR Developer

- Built a **VR shopping app** that allowed customers to browse and purchase virtual items within a 3D store environment.
- Created a **mobile AR clothing app** using Unity and ARCore/ARKit that let users preview 3D outfits in their surroundings before purchase.
- Implemented backend APIs, payment integration, and real-time 3D model loading for mobile devices.

Ping Technologies

01/2019 – 04/2020

Junior Game Developer

- Developed a 2D **mobile hyper-casual game** in Unity from prototype to release.
- Scripted gameplay loops, refined level flow, and optimized textures and animations for mobile performance.
- Worked with designers to align UI/UX and improve gameplay retention metrics.

PROJECTS

Cricket Simulator

This is one of the best VR projects I have worked on. It feels like real game going on in the stadium

Azlan

Rise of the Burlpups

Rise of the Burlpups offers a fully immersive VR experience unlike any other. Play now on Steam

Block Smash

It delivers an exciting and fast paced gaming experience designed to test your reflexes and precision.

AR Message Tree

Evolve innovative solutions come up with an immersive pop-up AR Apps for GITEX 2020

EDUCATION

Bachelor of Science in Computer Science

10/2013 – 11/2018

University of Management and Technology
