

BENJAMIN ALE

3D Artist

Budhanilkantha, Kathmandu, Nepal

+977 9822796303 | aalebenjamin@gmail.com | [Portfolio](#) | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

3D Artist and Multimedia Technologies graduate with 2 years of hands-on experience in Real-Time workflow, procedural shaders, lighting, rendering and 3D-Modeling for CGI, animation and 3D printing. Proficient in Autodesk Maya, Blender, Unreal Engine, Adobe Photoshop, Adobe Substance Painter, DaVinci Resolve, Adobe After Effects and Adobe Premiere Pro. Proven ability to solve technical issues through problem-solving and collaborations with the team.

TECHNICAL SKILLS

- **Software:** Autodesk Maya, Blender, Unreal Engine 5, Adobe Photoshop, Adobe Substance Painter, DaVinci Resolve, Adobe After Effects, Adobe Premiere Pro
- **Programming Languages:** Python
- **Core Competencies:** Lighting, Rendering, Procedural Shaders, 3D-Modeling, Unreal Engine Blueprint Scripting, Compositing, Editing
- **Language:** English (Highly Proficient), Nepali (Native), Hindi (Sufficient)

PROFESSIONAL EXPERIENCE

3D Generalist

Oct 2023 – May 2025

Fire Studios

Lalitpur, Nepal

Technical Art & Pipeline Optimization

- Architected high-fidelity 3D environments, from conceptualization through final rendering, ensuring artistic intent was aligned with technical constraints.
- Designed automated animation and cloth simulation pipelines, using tools like Maya, Blender, and Marvelous Designer, and integrating with Unreal Engine 5.
- R&D for Houdini to Unreal Engine workflows, allowing for a smooth transfer of complex simulations into real-time environments.
- Designed scalable PBR Master Materials in Unreal Engine, streamlining look dev and engine performance for large-scale projects.

Lighting, Rendering & VFX

- Managed end-to-end lighting and rendering workflows using Unreal Engine 5, Blender, and Maya, striking a balance between cinematic and real-time performance demands.
- Optimized complex 3D scenes for rendering pipelines, achieving a reduction in frame times and resource usage reducing render times by 10 Hours.
- Completed large volumes of VFX shot lists under tight production schedules, consistently meeting deadlines for all assets.
- Developed custom shaders and materials using Unreal Engine 5, Blender, and Maya, catering to visual quality and material responses.

Compositing & Collaboration

- Functioned as a Technical Artist between creative and technical groups to interpret intricate artistic needs into practical technical solutions.

- Handled post-processing and compositing of various elements with After Effects, combining motion graphics and 3D renders.
- Troubleshooted and fixed key technical roadblocks in various pipelines to ensure project speed and consistency.

Animator | Unity Asset Designer Intern

Sept 2023 – Nov 2023

Intopros Technologies

Lalitpur, Nepal

- Development of high-quality 2D and 3D assets, optimized for mobile performance, and implemented within the Unity Game Engine.
- Development of intuitive UI elements for mobile gaming, with the goal of creating a smooth and immersive gaming experience for the end-user.
- Improved the workflow and efficiency of the asset pipeline between Photoshop and Unity, resulting in productivity gains.
- Working collaboratively with the development team to improve and optimize the assets, focusing on technical and aesthetic performance.
- Early-stage R&D and rapid prototyping, with the goal of determining the fundamental visual mechanics of the mobile game.

Unreal Generalist Intern

April 2022 – Jun 2022

AP1 Television – Annapurna Broadcast Media

Kathmandu, Nepal

- Designed virtual TV sets using Unreal Engine and Autodesk Maya.
- Troubleshot problems and optimized the performance of the sets for real-time rendering.
- Assisted the technical team in ensuring a smooth production workflow.
- Designed sets for real-time virtual environments and augmented reality experiences.
- Assisted in the creation of real-time PBR shaders.
- Assisted in the creation of 3D motion graphics.
- Designed various 2D and 3D assets for the sets in TV news production.

EDUCATION

BSc (Hons) Multimedia Technologies

Sept 2021 – Dec 2024

London Metropolitan University

Islington College, Kathmandu

- **Key Modules:** Visual Effects for computer graphics and games, Moving Image and VFX, Advanced 3D Modeling and Animation, Modeling and Texturing
- **Final Year Project:** “Reviving Old Classics: Recreating Classic Game Environments in Modern Game Engines” – Remastered the environment of an old game in Unreal Engine 5, utilizing the strengths of a modern game engine to realize the full potential, quality and scale wise, of the environment.

A Levels: Mathematics, Physics, Chemistry, Computer Science

Jun 2018 – Jun 2021

British Model College

Kathmandu, Nepal

INTERESTS

Music, Warhammer 40k, Calligraphy, Model Building and Painting (Gunpla, LEGO, miniatures), Watches, Real Time Rendering Engines
