

George Besteiei

3D GENERALIST / TECHNICAL ARTIST

I'm a 3D generalist who handles both the artistic and technical sides—whether that's processing photogrammetry data, building assets, creating materials, animating, or optimizing for real-time or high-end renders.

What I help with: untangling messy workflows, bridging the gap between 'looks great' and 'actually works,' and solving those technical headaches that pop up mid-project.

I'm comfortable jumping between tools like Blender, Substance, ZBrush, and Metashape, and I enjoy figuring out pipeline solutions and scripting tweaks that make everyone's life easier.

My approach is iterative and experimental, focused on accurate and efficient translation of ideas in the digital realm. Whether you're working on games, AR, or product visualization, I can help move things forward smoothly while keeping the quality high and the team unblocked.

EDUCATION

- High school diploma
- Virtual reality specialist diploma
@ Infor-Elea Smart Business Academy

SKILLS

- Material and shaders authoring
- AI assisted scripting - Python/VEX
- 3D Modeling & UV
- 3D Visualization
- Mechanical rigging
- Games VFX
- Video editing & compositing

SOFT SKILLS

- Team player
- Reliable
- Realist about time estimation
- Balancing vision with constraints
- Open to critique
- Troubleshooting for fun

Experience

VIRTUAL REALITY SPECIALIST -Formation course
INFOR-ELEA Smart Business Academy
October – December 2025

An intensive 8 hours daily deep dive into Unreal Engine 5 systems and techniques including materials, particles blueprints, PCGs and animations. Held by INFOR-ELEA Smart Business Academy

3D ARTIST- TECHNICAL CONSULTANT Freelance
January 2025 – September 2025

- Preparing scan assets and improving workflows to include Artec Studio proprietary software. Client: Zalando

3D ARTIST – GENERALIST Orendt Studios GmbH
October 2020 – December 2024

This role implies the highest quality standards for artistic output along with strict technical requirements.

My daily tasks involve a holistic knowledge of 3d production and consist in the following:

- photogrammetry reconstruction and pointcloud data manipulation
 - photogrammetry post-processing (retopology, reconstruction by modeling/sculpting/solid CAD, PBR shading creation and procedural material authoring with Substance tool set)
-

LANGUAGES

- Romanian - native
- English – C2
- French – C1
- Italian – B2

OTHERS

- Driving licence

- 3D asset optimization targeted for real-time applications (automated with Simplygon/Instalod or SubDiv modeling) and offline rendering
- demo animation for RT assets including the preparation of rigging, skinning + weight painting and shape keys (Blender)
- material digitalization both from scanned data or fully procedural
- designing and scripting automatic render and post-processing templates lighting and rendering (Blender/Cycles or 3dsMax/Vray)
- video editing and post-production of renders (After Effects)
- asset integration for real-time engines (glTF to VR/AR or Unreal/Unity)
- researching and setting up workflows and tools documenting technical solutions and mentoring other team members

Client companies and their projects cover a wide range of domains like sportswear, automotive, technology, furniture, retail, medical tech, luxury products, arts and entertainment.

3D ARTIST BLASTPROOF GAMES

January 2020 - October 2020)

- Creating environment and gameplay 3d assets - modeling+texturing in PBR, realistic or stylized
- Implementation in game engine (Unreal / Unity)
- VFX and shaders (Unreal)

3D GENERALIST FREELANCE

July 2019 - January 2020

3d game assets production and in-engine implementation(Unity)

3D GENERALIST BIG BLUE STUDIO

April 2015 - July 2019

- 3d for illustration & realtime, texturing, Cinematics & VFX
 - 3D for illustration & realtime, texturing, Cinematics & VFX for various platforms.
 - 3d assets (model+texture) and VFX for titles as Memories of Mars and Steel Rats.
 - Cinematics, FX and characters expression morphs for Game House's Delicious games
 - 2D Illustration and game assets for 2d casual games
 - 3D base environments and objects then overpainted and assisted implementation for titles such as: Sea of Lies, Final Cut and Dead Reckoning, released by BigFish.
-

ART DIRECTOR/GENERALIST 2D/3D RVL GAMES

August 2011 - February 2015)

- Casual/adventure games art
- Creating concept art according to design.
- R&D for art style and establishment of workflow.
- Developing game art as 3d scenes and objects then using them as a base for the matte painting pass.
- Creating cinematic sequences, animations and VFX for use in games and for marketing.

THANK YOU FOR CONSIDERATION!
