Professional Summary

3D Generalist with over 15 years of professional experience across animation, advertising, and game production pipelines. Experienced in both full-cycle production and collaborative workflows, capable of building complete animation projects from concept to final delivery or contributing to specific stages of large-scale productions.

Specialized in modeling, look development, rigging, animation, lighting, and rendering using production-proven Blender pipelines while collaborating remotely with international studios.

Core Skills

- Character & Environment Modeling (High Poly / Low Poly)
- Look Development & Texturing
- Rigging and Animation
- Lighting & Rendering
- Commercial & Cinematic Animation Production
- Game Asset Creation & Real-Time Pipelines
- Blender Production Workflows
- Remote Production & Pipeline Collaboration

Professional Experience

Freelance 3D Artist — Self Employed (2012 – Present)
