PROFILE SUMMARY

Creative 3D Artist specializing in architectural visualization, product visualization, and animation using Blender. Since 2024, I have developed high-quality visual content focused on realistic lighting, structured storytelling, and brand-oriented presentation.

My work combines technical precision with creative direction, delivering visually compelling renders and animations tailored for commercial and marketing purposes. I am passionate about transforming concepts into polished visual experiences.

EDUCATION

B.Sc. Computer Science – Crawford University

October 2022 – September 2024

SKILLS AND EXPERTISE

- | | |
|--|-----------------------------|
| • Product Visualization | • Visual Storytelling |
| • Architectural Visualization (ArchViz) | • Cinematic Product Reveals |
| • 3D Modeling (Hard Surface & Environment) | • Motion Design Principles |
| • Photorealistic Rendering | • Timing & Easing Control |
| • Storyboarding & Pre-Visualization | • Storyboarding |

WORK EXPERIENCE

3D Product Visualization Artist (Freelance)

U.S.-Based Private Business (Remote) 2024

- Produced a commercial-style 3D product reveal animation for a consumer retail product.
- Handled full production pipeline: modeling, materials, lighting, animation, and rendering.
- Applied cinematic lighting techniques and structured camera movement to elevate product presentation.
- Collaborated directly with the business owner to align visuals with marketing goals.

- Directed and executed high-quality 3D product animations for commercial advertising campaigns.
- Developed cinematic reveal sequences for product packaging and electronic consumer devices, enhancing visual appeal and brand positioning.
- Oversaw lighting design and scene composition to achieve photorealistic and marketing-ready results.
- Produced structured, story-driven animation workflows from storyboard to final render.
- Created promotional video content for digital advertising, supporting product launches and online marketing initiatives.
- Maintained consistent brand aesthetics across multiple product visuals and campaign materials.

PERSONAL PROJECTS

1. Product Visualization

- **Ray-Ban Glasses Animation** Independently modeled, textured, and rendered photorealistic 3D product animations, creating marketing-ready visuals with realistic materials, lighting, and camera setups.
- **Fruit Vitamin Drink Design** Developed full 3D product visualization including modeling, texturing, and render, showcasing creative packaging and branding concepts.
- **Credit Card Animation** Created dynamic 3D animation of a credit card with realistic reflections and motion effects, demonstrating mastery of materials, lighting, and motion.
- **Fan Design:** Designed and animated a 3D fan as a personal project, focusing on mechanical motion realism and detailed product rendering.

2. Motion Design

- Produced original motion design animations as personal projects to explore dynamic storytelling, transitions, and visual effects.
- Developed social-media-ready content that demonstrates expertise in motion graphics, animation software, and creative direction.
- Developed a looping background spiral animation, involving various shapes and various dimensions.

3. 3D / Cinematic Animation

- **Car Animations** Created cinematic 3D car sequences as independent projects, including modeling, environment design, and camera work for realistic and immersive visuals.

4. Environment & Interior Visualization

- **Room Visualization** Modeled and rendered realistic interior spaces, emphasizing lighting, textures, and composition to create visually compelling environments
- **Interior Visualization:** Modeled and rendered realistic living room, that contains great lighting, and furniture's. Postproduction was done in adobe photoshop.

TOOLS & SOFTWARES

- **Blender**
- **Adobe Photoshop**
- **Adobe Premier pro**
- **Capcut**
