PROFESSIONAL SUMMARY

Senior Technical Artist with 25+ years of experience across Games, VFX, Virtual Production, Cinematics and Real-Time Visualization.

I specialize in procedural asset creation, technical pipelines, environment tools, character rigging, shaders, and real-time optimization.

Highly skilled in Unreal Engine, Houdini, Maya, Unity, C++, 3D Coat and SpeedTree

I bridge the gap between art and engineering by building scalable workflows, solving complex production issues, and improving team efficiency.

I have worked with international teams worldwide and delivered tools, systems, and assets for games, film, VR/AR, visualizations, and interactive experiences.

I'm ready to bring my experience into a long-term role in your studio.

CORE SKILLS

Procedural Content Generation - Houdini-based environments, props, terrain and VFX

3D Modeling & Rigging - Real-time ready characters, props, and creatures

Environment Creation - Modular design, foliage, lighting, and atmosphere

Programming & Tools - C++, Unreal Engine Blueprints, ShaderFX, Niagara

Pipeline Optimization - Asset performance tuning, automation scripts, LOD systems

Cross-Disciplinary Collaboration - Working with art, design, and engineering teams

PROFESSIONAL EXPERIENCE

Senior Technical Artist - (2017-2025)

Delivered procedural tools, rigging systems, real-time environments, simulations, and optimization for game studios, VFX companies, and VR/AR teams worldwide.

3D Generalist -(2005-2017)

Worked on advertising, feature films, visualization projects, VFX simulations, and 3D pipelines.

3D Artist - (1999-2005)

Various roles in 3D, animation, visualization, motion graphics and TV commercials

Some studios I worked with: Dypius, Master Solution, Stargate Studios, MuseVFX, Yukfoo Studios, Caipirinha Games, Noexis Lab, Campbell Marson, Solaborate

SOFTWARE & TECH STACK

Houdini, Unreal Engine 5, Unity, Maya, SpeedTree, 3D Coat, Photoshop, C++, Blueprint
