

Samuel Audu

Passionate about video game development with expertise in creating 3D assets. Proficient in Blender, Substance Painter, and Unreal Engine, with a commitment to continuous learning of new software. Demonstrates strong self-motivation and ability to collaborate effectively in small teams.

SKILLS

- Problem-solving
- Teamwork
- Attention to Detail
- Animation rigging
- 3D modelling and texturing: Blender, Substance Painter, Substance Designer
- 3D animation: Cascadeur, Mixamo, Actorcore
- Rendering: Unity, Unreal Engine
- Photo & Video editing: Adobe Photoshop, Lightroom, DaVinci Resolve
- Hard surface modeller
- Strong understanding of Blender, Substance
- Technical documentation
- Asset optimization
- Game engine integration
- Modelling and texturing 3D assets
- Setting, lighting, and rendering 3D environments
- Agile, Scrum methodology

WEBSITES, PORTFOLIOS AND PROFILES

EXPERIENCE

3d Artist

WeeTattie Studios - Dundee, United Kingdom, United Kingdom

- 01/2024 - Current
- Creating optimised 3D props and environmental assets for a VR archaeology and horror puzzle game.
- Crafted and textured historically inspired artefacts, furniture, and interactive puzzle items using Blender, Substance Painter, and designer software while focusing on realism, atmosphere, and environmental storytelling.
- Compiling references into PureRef to support realistic asset development.
- Integrating assets into Unreal Engine, ensuring strong performance for VR.
- Collaborating closely with designers and developers to support gameplay, narrative clues, and immersive worldbuilding.
- Utilize professional 3D production software (Blender, Substance Painter, Unreal Engine) for asset creation.
- |Website: <https://weetattiestudios.com/>.

3D Creature Animator

Kreek Interactive - Portsmouth, United Kingdom, United Kingdom

- 01/2023 - 04/2023
- Designed and built animation-ready creature rigs, and created dynamic, expressive animations for gameplay.
- Developed efficient skeletons, skinning, and deformation systems, as well as animating combat, traversal, and behavioural cycles.
- Collaborated closely with designers and programmers to ensure animations feel responsive, fluid, and aligned with gameplay needs.
- Engaged in continuous professional development to enhance skills and knowledge in animation.
- Verified animation quality and made improvements to align with technical constraints and artistic direction.
- |Website: <https://www.kreekinteractive.com>.

3D Vehicle Artist

Royal Navy - Portsmouth, United Kingdom, United Kingdom

- 11/2022 - 04/2023
- Created accurate, high-fidelity 3D aircraft models and interior components based on technical references and real-world specifications.
- Built modular parts, mechanical systems, and detailed assemblies used in maintenance procedures.
- Optimised models and textures for real-time performance while preserving mechanical accuracy.
- Worked closely with engineers, designers, and subject matter

EDUCATION

- 08/2024
Certificate Manual Software Testing
Almond Careers - London, United Kingdom
- Covered how to design and execute test cases, report bugs clearly, and understand different types of testing, such as functional, usability, regression, and exploratory testing
 - Studied how to analyse requirements, identify edge cases, and think from a user's perspective to catch issues early
 - Partnered with an interdisciplinary team to build, test, and optimise a hotel website
 - Gained knowledge of Agile workflow
- 06/2023
Bachelor of Science Computer Games Technology
University of Portsmouth - Portsmouth, United Kingdom
- Achieved a Second Class (Upper Division) degree
 - Focused on art aspects of video game creation, as well as learning a core understanding of motion capture, game design, and teamwork
 - Created a game-ready environment on a client-based project as a final-year project
 - Creatively collaborated with game development teams as a prop artist, animator, vehicle artist, and weapon artist
 - Achieved 70% and above in Foundation in 3D Modelling, Prototyping and Iterating Game Designs, and Create Worlds

PROJECTS

- Projects Character Design Project (Based on a Fantasy Novel)
Tools: Blender, reference workflows, online tutorials
- Created a custom 3D female character inspired by a novel, adapting a Blender preset to match detailed descriptions from the author.
 - Researched and applied multiple character-creation workflows to improve modelling and design quality.
 - Rigged and posed the character for final render shots delivered to the author.
 - Gained practical experience in character art pipelines, client collaboration, and iterative design.
- Stylised Fantasy Weapon Asset Pack
Tools: PureRef, Blender, Substance Painter, Unreal Engine
- Produced a 20-asset stylised fantasy weapon pack under a tight, self-managed production schedule.
 - Organised visual references in PureRef into structured categories

(base reference, sculpting style, texture style, stylised style) to guide consistent art direction.

- Modelled, sculpted, retopologised, and UV-unwrapped all assets in Blender.
- Textured assets in Substance Painter, leveraging smart masks to speed up pipeline efficiency.
- Set up lighting, environments, and final renders in Unreal Engine for polished presentation.
- Increased proficiency in Blender and Substance Painter while improving workflow efficiency and time management.

Client Game Environment Project (Final Year Bachelor's Project)

Tools: Unreal Engine, Blender, Substance Painter

- Designed and built a complete video game environment for a client as part of a final-year degree project.
- Modelled, sculpted, textured, and optimised all assets for Unreal Engine, ensuring strong performance and visual consistency.
- Created asset materials and set up the full environment, including lighting, fog, HDRI, and filters to enhance atmosphere and clarity.
- Gained significant experience in environment setup, optimisation workflows, and Unreal Engine's scene-building structure.
- Successfully delivered the project, receiving strong client feedback while identifying areas for further growth and refinement.
