

ANIS KHOUDI

3D Artist | Front-End Developer | UI/UX |

Specialised in visual design and 3D creation, I excel at delivering immersive and refined experiences through advanced skills in Blender and Unreal Engine. My keen eye for detail and commitment to high-end quality make me a well-rounded profile, capable of transforming ideas into impactful visual achievements.

EXPERIENCE

06/2025 – today

Unreal Engine developer | Digital Experience Designer

Aymen Promotion Immobilière

Led the development of interactive VR and real-time projects for virtual residential visits, from concept to deployment.

- Designed and built immersive VR experiences optimized for Meta Quest 3 with free navigation and real-time interaction.
- Developed a desktop 3D experience in real-time for the web using Vagon streaming service.
- Implemented interactive systems enabling users to change materials, textures, furniture, kitchen assets, and electronic equipment dynamically.
- Produced high-quality real-time and photorealistic residential renders using Unreal Engine.
- Collaborated with the digital marketing team to create cinematic intros, 3D renders, and immersive visuals for social media campaigns.
- Contributed to campaign ideation and, when required, handled design conception and animation execution for marketing visuals.
- Worked closely with filmmakers on editing, motion design, and VFX production using After Effects.
- Leveraged AI tools to optimize workflows and accelerate creative production across 3D and video pipelines.

12/2024 – 06/2025

Freelance

Kaos Studio

Led artistic direction and visual development for rebranding projects for various clients.

- Supervised and executed complete rebranding projects.
- Developed the brand's showcase website using Next.js and Three.js Fiber, integrating immersive visuals.
- Created impactful 3D animations using Unreal Engine and Blender.
- Ensured visual consistency of brand identity and drove graphic innovation across all productions.

09/2024 – 12/2024 **Designer & Front-End Developer**

Bdigitall

Responsible for the complete redesign of the company website and creation of modern, cohesive brand visuals. Also developed internal tools to automate manual and repetitive company processes.

DEVELOPMENT PROJECTS:

Web Application - NFC Read/Write/Lock

- Developed a React application to automate Bcard production using the ACR122U reader: reading, writing, and locking NFC chips.

React Native Application - NFC Read/Write/Lock

- Developed a React Native app to automate Bcard production via integrated smartphone NFC readers: reading and writing NFC chips.
- Created a React application to automate processing of large Excel files containing customer data.

Utility Scripts

- Automated downloading, conversion, and processing of QR code files: SVG to PNG conversion, colour changes, and print preparation.

CEP Extension for Illustrator (version 25.0)

- Developed and integrated a CEP extension for Illustrator to automate preparation of print sheets for mass card production.

Redesign of BDigitall.co website

- Complete UI/UX design for Bdigitall.co.
- Built the website with WordPress and Elementor, following my own UI/UX prototype.
- Integrated an online payment system in Algerian dinars via Sickpay.

DESIGN PROJECTS:

- Produced 3D visuals for company communications using Blender and Unreal Engine: scenes, product renders, and immersive elements.
- Created banners, flyers, and visual communication materials.
- Designed custom card designs for each NFC client.

08/2022
09/2024

-Front-End Developer & UI/UX Designer

Digitup Company

Contributed as a front-end developer and UI/UX designer at all stages of design and development for multiple projects.

DEVELOPMENT/DESIGN PROJECTS:

OhMyJob

Integrated management platform for recruitment in the temporary employment sector.

- Worked closely with developers and product managers to gather requirements and integrate feedback into the design process.
- Designed wireframes with Figma.
- Front-end development with React.js and Material UI 5.
- Developed an archiving module for payslips and invoices using the Coffreo API.
- Set up a continuous integration pipeline on GitHub.
- Integrated Google Maps and Weather APIs.

Bahrein Tennis Club

Web application for management of the BTA Tennis Club (Bahrein Tennis Club).

- Designed mobile and web wireframes with Figma.
- Developed features for scheduling coaches, assigning classes, and coordinating club activities.
- Set up a continuous integration pipeline on GitHub.
- Integrated TAP Gateway API for payments.

Bdigital.co

Web application for managing digital business cards (using NFC and QR codes).

- Designed wireframes with Figma.
- Developed features for managing subscriber cards and orders.
- Set up a continuous integration pipeline on GitHub.

DESIGN-ONLY PROJECTS:

Digitup Company: IT solutions provider specialising in web and mobile applications.

- Created visual identity, including logo and brand elements.
- Designed web wireframes with Figma.
- Produced various promotional materials, including flyers, presentation templates, and 3D elements.

Tamkeen International: Consulting centre for public and private sector reform, driving economic growth in Libya.

- Designed web wireframes with Figma.
- Designed a company brochure presenting services and key information.

Moonz App: Dating app based on astrological signs.

- Designed web wireframes (Admin Dashboard) with Figma.

Prestirama: E-commerce agency - Furniture and living rooms.

- Designed web wireframes with Figma.

Maria: E-commerce website - beauty products.

- Designed web wireframes with Figma.
- Created illustrations and 2D elements for the website.

Prestacab: Collaboration platform for self-employed healthcare professionals in France.

- Designed and created the complete visual identity, including logo and brand elements.
- Designed wireframes with Figma.

Neaper

Mobile App Project

Mobile app for instant sharing of contact details, social networks, and websites (Neaper virtual business card).

- Designed and created logo.
- Animated logo for the app splash screen.
- Produced promotional videos and motion graphic resources for the mobile app using Lottie Files and After Effects.
- Designed wireframes with Figma.

2021 – 08/2022

Web Developer

Eurl Alamo

Worked on an open source project and collaborated closely with clients to understand their needs and translate them into effective web solutions.

PROJECTS:

ALRAF

Design and implementation of the Algerian National Registry of Atrial Fibrillation (ALRAF) in collaboration with Biopharm.

- Designed wireframes with Adobe XD.
- Front-end development using React.
- Data visualisation on Algeria map using React-Leaflet.
- Used Git/GitHub for continuous integration.
- Database with Firebase.
- Deployment using Google Cloud Platform.

Maarch

Implemented an open source solution for electronic document management (archiving, mail, digital signatures).

EDUCATION

2017 – 2020

Master's Degree

University of Science and Technology Houari Boumediène (USTHB)

Software Engineering

2014 – 2017

Bachelor's Degree

University of Science and Technology Houari Boumediène (USTHB)

Information Systems and Software Engineering

LANGUAGES

English - fluent

French - fluent

SOFTWARE

Figma - Advanced

Adobe Suite - Advanced

Blender - Proficient

Unreal Engine - Proficient

SKILLS

- Communication skills

- Problem solving

- Ability to work under pressure and reliability
