PROFESSIONAL SUMMARY

Experienced and detail-driven 3D Visualizer with **over 5 years** in the global furniture and interior visualization industry. Specialized in creating hyper-realistic, render-ready 3D furniture assets for e-commerce, configurators, and real-time use.

I've contributed to projects for international studios including Chilli Pepper Designs, Nfinite, Articture, Orbital Vision, and Simatai, producing hundreds of product visuals for brands featured on Wayfair, Amazon, and designer showrooms.

Whether building from CAD, photo references, or sketch concepts — I bring technical precision, creative composition, and full pipeline delivery from modeling to cinematic rendering.

Open to full-time roles, remote positions, freelance contracts, and relocation support.

CORE SKILLS

- **Software:**
3ds Max, Unreal Engine 5, ZBrush, Substance Painter, Substance Designer, Marvelous Designer, Photoshop, DaVinci Resolve
- **Rendering Engines:**
V-Ray, Corona Render, Marmoset Toolbag
- **3D Techniques:**
Photorealistic Rendering, PBR Texturing, UV Mapping, Low/High Poly Modeling
- **Specialties:**
Furniture Visualization, E-commerce Asset Creation, Architectural Visualization, WebGL Optimization
- **Other:**
Post-Production, Lighting & Composition, Real-time Rendering, Client Collaboration

PROFESSIONAL EXPERIENCE

ARTICTURE

Remote

Freelance 3D Product Artist

2025 – PRESENT

- Delivered **hero renders and lifestyle shots** for seasonal campaigns, using cinematic lighting setups in Corona Renderer and Photoshop grading.
- Textured high-poly assets for sofas, lighting, and accessories using **multi-layered PBR shaders** in Substance Painter to achieve high realism.
- Boosted engagement by **35%** on product launch posts by developing **on-brand visual narratives** in collaboration with marketing designers.
- Ensured fast approvals by delivering moodboards and clay previews for visual direction alignment.

INDEPENDENT PROJECTS - UPWORK CLIENTS

Remote

Freelance 3D Furniture Modeler

2019 – PRESENT

- Created over **100 customized 3D furniture designs** for boutique labels and early-stage startups.
- Developed **interactive Unreal Engine walkthroughs** for residential projects, increasing client engagement during virtual tours by over 50%.
- Built a personal library of over **100 Substance-based PBR materials** to accelerate production and ensure stylistic consistency across projects.

- Maintained a **100% job success rate** on Upwork by delivering under NDA, with fast turnaround and consistent 5-star reviews.

NFINITE

Remote

Freelance 3D Modeler & Renderer

2022 – 2024

- Crafted over **400 e-commerce-ready 3D furniture assets**, adhering to strict polycount, UV, and texture guidelines to ensure real-time compatibility.
- Maintained **scene consistency and lighting standards** by implementing internal template presets and object naming conventions.
- Ensured a **98% asset approval rate** by integrating automated checks and following platform documentation rigorously.
- Accelerated asset delivery by **25%** by using batch export scripts and reusable material libraries customized for common furniture SKUs.

CHILLI PEPPER DESIGNS

Remote

Freelance 3D Furniture Artist

2022 – 2023

- Modeled over **150 furniture SKUs** from 2D technical drawings and visual moodboards in 3ds Max.
- Developed **accurate PBR materials** for various finishes (wood, velvet, brass) using Substance Painter, improving realism and reducing post-correction by 40%.
- Delivered **neutral-lighting renders and turntables** optimized for Shopify and printed catalogs, increasing customer product interaction.
- Reduced project revision cycles by **40%** by standardizing modeling workflow templates, pre-approved shaders, and detailed QA checklists before submission.

ORBITAL VISION

Remote

Freelance 3D Furniture Modeler

2021 – 2025

- Produced over **300 furniture models** following Nfinite's production standards for topology, UVs, and materials.
- Achieved **100% compliance with technical guidelines** by using automated validation tools and version-controlled model submissions.
- Improved modeling speed by 20% by creating a library of reusable base meshes (chairs, tables, sofas) and batch baking AO maps in Substance.
- Applied scene-wide lighting presets and HDRI environments to ensure visual uniformity across multiple projects.

SIMATAI STUDIO

Tunisia

Senior 3D Visualizer

2020 – 2025

- Produced over **200 photorealistic architectural visualizations** for residential, commercial, and luxury projects using 3ds Max, V-Ray, and Corona Renderer.
- Converted **AutoCAD drawings and concept sketches** into detailed 3D environments, ensuring architectural accuracy and client vision alignment.
- Managed **end-to-end rendering pipeline**, including lighting, shading, and post-production using Photoshop and After Effects.
- Improved rendering efficiency by **30%** by optimizing scene geometry, reducing polycount with modifiers, and automating repetitive tasks using **MAXScript batch rendering tools**.
- **Created over 1,000 high-quality product mockups** for global brands such as Auchan, Picard, and Casino, ensuring brand consistency and visual appeal across marketing campaigns.
- **Skilled in Photoshop-based mockup creation**, integrating 3D elements when needed to achieve realistic and engaging visuals.
- Collaborated with design teams to adapt client-provided assets into **market-ready, on-brand mockups** for catalogs, e-commerce, and advertising.

EDUCATION

HIGHER DIPLOMA IN MECHANICAL MANUFACTURING DESIGN

Higher Institute of Technological Studies

2010 – 2013

Ksar Hellal, Tunisia

3D EXPERTISE

MODELING & ASSET CREATION

- Hard-surface modeling (sofas, tables, chairs, decor).
- Furniture from CAD, sketches, or references.
- Clean UV unwrapping and topology.
- STL-ready for 3D printing when needed.

TEXTURING & MATERIALS

- Physically Based Rendering (PBR workflow).
- Substance Painter / Designer for material libraries.
- Multiple fabric, leather, metal, and wood finishes.
- Baking maps (AO, curvature, normals, ID).

RENDERING & POST

- Corona & V-Ray for photorealistic outputs.
- Scene lighting, HDRIs, product staging.
- Photoshop & DaVinci for post-production & grading.

REAL-TIME & INTERACTIVE

- Unreal Engine 5 for walk-throughs & scenes.
- Level of Detail (LOD), scene optimization.
- Marmoset Toolbag for quick previews.
- Web-optimized glTF / GLB exports.
