PROFESSIONAL SUMMARY

Dedicated, highly adaptable and knowledgeable 3D artist/Tech Artist/ Simulation Designer with over 16 years experience. I have worked on designing scenarios, creating 3D content, environments and physics setups for Robotics simulations, Surgical Simulations (Arthroscopic and Laparoscopic) and Medical VR training. I also have extensive experience in creating industrial visualisations and animations to help your company demonstrate and sell its products and services, I have led teams, created workflows and standards, created E-learning courses, mentored junior colleagues and assisted marketing departments with graphic design. I am well versed in working in real time engines including Unity, Unreal Engine and proprietary simulation engines as well as proven experience in Maya, 3Ds Max, Blender, Zbrush, Houdini, Substance Painter & Designer, Photoshop, After Effects. I have experience working in Agile environments and software development workflows, well versed in version control and documentation and pride myself on my adaptability and ability to pick up new software and workflows extremely quickly.

WORK EXPERIENCE

Freelance

Jan 2016 – Present

3D and Real-Time Simulation Generalist

Ellon, UK

- Production of animations, vfx and 3D models for clients
- Supporting companies in the creation of real-time 3d models and setups for surgical simulators
- 2D and 3D Graphic Design for still imagery and infographics
- Pattern & Fabric Design
- Marketing, Media Purchasing and Web Design for E-Commerce and E-learning

Fundamental VR Ltd

Mar 2023 – Jul 2024

Senior 3d Artist

Remote. UK

- Modeling of complex anatomy and surgical tools for VR surgical simulations developed using Unity
- Production of 3D assets, renders and unity demos to support pre-sales activities
- Creation of scenes and scenarios for training cases
- Maintaining Models, Scripts, Scenes in Unity
- Research and development for model and texture efficiency for projects running on untethered VR, including animation optimisation using Vertex Animated Textures (Meta Quest 2)

Virtamed AG

Mar 2018 – Nov 2020

Nov 2020 - Sept 2021(Freelance)

Senior 3D Artist / Simulation Engineer / Tech Artist

Zurich, Switzerland

- Modeling of complex anatomy and medical instruments for orthopedic surgery and laparoscopic simulators using Unity and proprietary simulation engines
- Creation of realistic organic procedural materials using Substance Designer for internal anatomy
- Fine tuned physics behaviours of soft-body physics to represent real-world surgical conditions
- Simulation design and creation of scenes and scenarios for training cases with unique pathologies and bespoke medical instruments
- Maintained close working relationships with clients and doctors to ensure high level of accuracy in graphics and physics behaviours
- Research, development and implementation of procedural geometry creation and automated pipeline tasks with Houdini

Subsea 7 Ltd**Sept 2013 - Feb 2018***Visualisation and Graphics Lead**Westhill, UK*

- Led and supervised the planning, budgeting, creation and delivery of animations and still images to promote offshore construction projects
- Supervised Junior staff and led the global animation community in setting standards that decreased the time needed to deliver projects
- Spearheaded the introduction of software such as Vray, Substance Suite, After Effects and Unreal Engine to increase quality of imagery produced in the department
- Global point of contact for all Visualisation and Animation workflows, visual standards and direction.
- Guided leadership on and researched the potential of VR technologies for asset previews, access checks and education
- Graphic Design support for the Marketing Department

Fugro Subsea Services Ltd**Nov 2011 - Sept 2013***Simulation Engineer**Aberdeen, UK*

- Creation of 3D models, Building simulation Scenarios for Subsea ROV applications in Fugro Deepworks simulation software using Proprietary Ogre based Engine
- Maintained close inter-departmental communication with design engineering team to prototype and test bespoke tooling in a simulated environment to validate designs before manufacture
- Simulation design and creation of Scenarios to be linked to real world telemetry from vessels/equipment to provide simulated real-time 3D overviews of in-progress offshore construction operations
- Developed and implemented an improved workflow for converting CAD models for use in simulations, improving efficiency and visual quality
- Planning and creation of 3D animations to demonstrate tool capabilities to clients.

Fugro N.V**Jul 2009 - Nov 2011***E-Learning Developer**Aberdeen, UK*

- Development of 3D animations to be used in E-learning courses to support engineer training
- Development of 2D interactive scenarios using Adobe Flash
- Liaise with subject matter experts to create E-learning courses that are clear and accurate
- Development of Graphic Designs to support E-learning courses.

EDUCATION

Robert Gordon's University**2007-2009***Bsc(hons) Multimedia Production**Aberdeen, UK***SKILLS**

3D & Design Tools: Maya, ZBrush, Blender, 3DS Max, Houdini, Substance Painter/Designer, Cinema4D, Photoshop, Illustrator, After Effects

Game Engines: Unity, Unreal Engine (inc. Blueprints), Proprietary Engines

Development & Workflow: Simulation Design, Workflow Optimisation, Geometry/Texture Optimisation, PBR Workflow, Photogrammetry, Vertex Animated Textures, Procedural Geometry/Materials, Git, Jira, Agile/Scrum

VR/AR Platforms: Meta Quest, HTC Vive, Oculus Rift, Tethered VR

Soft Skills: Team Leadership, Cross-Functional Collaboration, Client Communication, Mentoring, Project Coordination
