MOST RECENT EXPERIENCE

Freelancer / Remote
Game Developer & 3D Generalist London UK
2024 - Present

Stylized assets for unannounced indie game (PC)

- Translated concepts → optimized 3D models (Blender/Substance)
- Built 3D modular systems & standardized Unreal Engine PBR workflows
- Optimized assets (UVs/LODs) for target performance
- Collaborated remotely with teams on art-tech balance

3D Generalist TripledotStudios London UK
Nov 2021 – 2024

Merge Party / Woodoku /Block Family (Mobile)

3D Pipeline & Production (Merge Party)

- Defined naming conventions and folder structures (source files → Unity)
- Established prefab systems with Tech Art for optimized workflows
- Modeling/texturing/animation for key in-game assets
- Managed outsourced content: briefing, quality control and integration
- Coordinated weekly workload across 3D artists
- Assembled/lit Unity scenes and tested on target devices

Introduced new 3D elements (Woodoku)

- Art Direction: Partnered with AD to design feature visuals within technical constraints
- Background Art: Created style-matched concepts for mobile optimization
- 3D Production: Modeled/textured environments and animated props (e.g., interactive blocks)
- Pipeline Setup: Established naming conventions and asset specs with Tech Art
- Scene Lighting: Implemented baked lighting solutions for consistent visual quality

3D Content (Block Family)

- Asset Production: Modeled/textured 3D blocks from 2D concepts (Blender/Photoshop)
- Unity Setup: Built scenes with prefabs, materials, and collision systems
- VFX/Systems: Implemented particle effects and event triggers
- Lighting: Baked lightmaps for performance efficiency

OxfordVR London UK
Sept 2018 – 2021

Created VR Experience for healthcare innovation

- Character Design: Developed concepts and modeled stylized characters (Blender/ZBrush)
- Apparel/Texturing: Crafted clothing in Marvelous Designer and textures in Substance Painter
- Unity Integration: Rigged/assets for VR use with animation-ready topology
- Animation Prep: Collaborated with leads on optimal wireframe deformations
- Environment Art: Produced 3D props.

3D Generalist – INITION London UK
Jan 2018 – Sept 2018

Gear VR projects (BP)

- Asset Production: Modeled/animated 3D elements in 3ds Max for 360° video
- Lighting/Rendering: Implemented Vray setups for immersive VR lighting
- Post-Processing: Composited renders with After Effects for client deliverables
- Client Work: Developed branded assets for BP project within tight deadlines

3D Generalist - Contract Product Madness
Aug 2017 - Nov 2017

Transitioned 2D slot machines to 3D (Heart of vegas)

- Pipeline Innovation: Introduced 3D tools and established PlayCanvas workflow
- Environment Art: Modeled/textured 3D backgrounds and UI elements
- Asset Production: Created 3D slot machines with optimized textures
- Implementation: Integrated assets into PlayCanvas for real-time rendering

Freelance Paris & London
July 2017 - Aug 2017

3D and 2D design VR / Game consultation and implementation

3D Generalist 421Q London UK
Jan 2016 - July 2017

Commercial, retail, and residential VR / Unreal Engine / Unity / VRAY

3D Generalist UNITY Brighton UK
May 2015 - Jan 2016

Created educational 3D content

- Produced tutorial assets for Unity's learning platform
- Modeled/textured optimized demos for real-time workflows
- Implemented examples in Unity for official documentation

EXPERTISE

Modeling Software :
Blender - 3DS Max - Maya - Zbrush -
Marvelous Designer

Texturing :
Substance Painter - Substance Designer

Render Engine :
UNITY - UNREAL - VRAY - ARNOLD

Video :
After Effects - Adobe Premiere

Concept:
Photoshop - Painter - Illustrator

SKILLS

Native French speaker
Time Management
Attention to detail
Communication Visual Presentation

EDUCATION

Game Design Certification
ITECOM Paris

Bachelor's Degree - Typographic Design
Elisa Lemonnier Paris
