Cosette Dela Merced

SKILLS

I've always loved creating original characters and environments in my sketchpad then recreating a modeled rendition of the asset in Zbrush or Maya. The programs I've learned are Autodesk Maya, Zbrush, and Substance Painter. The focus of my final project was to use the 3D creation pipeline to create an original character from conceptualization to a stylized NPR rigged model.

Portfolio

Artstation — *Examples of 3D work*
