

About Me

Focussed on building a career as a 3D artist, particularly in character animation. Creative and detail-oriented 3D animator with a passion for bringing characters, environments, and visual effects to life.

Proficient in industry-standard software such as Maya and After Effects, with a strong foundation in animation principles, rigging, and motion design. Experienced in both character and cinematic animation, collaborating closely with designers, modelers, and developers to craft engaging visual narratives.

Adept at problem-solving and meeting tight deadlines while maintaining a high standard of work. Eager to contribute artistic vision and technical expertise to a dynamic animation team.

English Literature – 8

Religious Studies – 8

Combined Science – 6 7

Engineering – Level 2 Merit

History – 6

HOBBIES & INTERESTS

- Any form of art. I have spent years building a personal portfolio, specialising in 3D Animation, particularly character animation, modelling, texturing and rigging.
- My Advanced Open Water qualification in scuba diving has allowed me to explore parts of the planet that most people never experience. Alongside the enjoyment of the hobby, I have learnt essential life skills such as the importance of teamwork, multitasking and remaining calm under high pressure.
- Dedicated to physical fitness, including weightlifting, running, swimming etc, which has simultaneously aided my understanding of anatomy, allowing me to apply it to my animation work.
