Profile:

As an experienced digital character artist with 6 years of professional experience and 7 years of additional hobbyist experience, I am passionate about bringing characters to life and making them believable, whether I'm translating an existing piece into 3D or starting from scratch. Even though I have started my career as a Technical artist and shown a proficiency in that field, my passion has always pulled me towards character art.

Overall, I am a well versed and motivated Character Artist with a proven track record of delivering high-quality assets on time and within budget. I am excited about the opportunity to contribute my skills to a dynamic team and help bring engaging characters to life.

Key Skills:

- Strong understanding of anatomy, form, shape, color theory, and lighting with the ability to translate that knowledge into both creature, animal, and human characters.
- Proficiency in texturing, rigging, animation, and optimization for real-time and offline rendering.
- Ability to create realistic and stylized characters for different platforms, including games, animations, and films.
- Fast learner with excellent communication and problem-solving skills with a focus on real-time rendering.
- Proven ability to work under tight deadlines, collaborate effectively and self-manage tasks to deliver a high-quality result.

Experience:

Straight4 Studios: Character Artist (October 2023 – December 2025)

- As a sole character artist, I oversaw every step of the process, from creation to rigging and engine integration
- Creating High poly and well optimized Game Ready characters and creatures
- Cooperating with Gameplay and rendering teams to ensure proper integration with other aspects of the game
- Working with animators to ensure creation of production ready rigs, with custom rig logic
- Setting up workflows with detailed documentation

Valsogard Enterprise LLC.: Lead Character TD/ Generalist (January 2022 – October 2023)

- Experience within every aspect of Character creation across multiple projects, both as a Developer and as a Team Lead.
- Creating High poly meshes of props and characters within a variety of styles based on clients' wants and needs.
- Working with an outsourced concept art team to bring their 2D art into real time game ready assets.
- Setting up Rigging workflows and leading a team to ensure proper deformations of props and characters.
- Building state engines and animations for a third person MMO game.
- Building and leading Environment and Technical art teams.
- Designed and maintained production workflows, documentation, task delegation, and source control pipelines.

REBLIKA - The Character Company: Character/Technical Artist (May 2021 - August 2022)

- Collaborated in teams to deliver high-quality characters for real time and offline rendering.
- End-to-end character creation: high poly sculpting, retopology, grooming and cloth simulation
- Created full animated ads for a French children's clothing brand with a team of riggers and animators within unreal engine
- Optimized meshes and workflows and ensuring a streamlined conversion from high poly meshes to optimized low poly meshes without sacrificing visual fidelity
- Experience with creating Body and Face (FACS) rigs

Sekai Digital Twins Ltd.: Junior Technical Artist (June 2020 - August 2021)

- Creating and optimizing high density modeling data to create large scale real-time digital twins for companies like Siemens and Phillips.
- Creating tools, shaders and VFX within Unreal Engine to bring Digital twins to life in a cross-platform environment (PC, XR, Android, IOS)
- Creating, rigging and setting up VR and PC avatars.

Grads in Games - Sumo Digital Rising Star 2020

Character art competition:

- Awarded the "One to Watch" award in the Grads in Games 2020 challenge

Education:

University of Derby - Computer Games Modelling and Animation (graduated 2021)

- Developed Independent research and learning abilities.
- Working within teams with the Games Programming modules on two separate projects
- Experience with Sculpting, Modelling, Rigging, PBR and NPR Texturing, Concept art for Environments and Characters as well as Figure Drawing.

CAE Cambridge English

- Proficiency C1.
