ABOUT ME

In 2019, I commenced my studies in Design and Technology at the University of Aveiro, Portugal, having earned a scholarship through my outstanding performance in a national examination in Brazil. Upon graduating in 2022, I gained substantial industry experience at PTC Group, a leading provider of design and engineering services for the automotive sector. There, I contributed to projects for major automotive clients, including Ford and Renault Alpine, delivering top-tier Class A surfaces, recognized for their market-leading precision and quality.

As a Concept Designer at Bambou France Packaging, I have led the conceptual development and 3D modeling of coolers and bottles, alongside image editing for customized product lines. I possess advanced proficiency in SolidWorks, Autodesk Alias, Blender, Vred, Blender Cycles, and Photoshop, with a strong emphasis on concept design and visualization.

My current goal is to grow professionally and technically, focusing on expanding my expertise as a concept designer and 3D modeler while continuing to deliver high-quality design solutions.

WORK EXPERIENCE

23/07/2024 – 24/10/2024 Toulouse, France

● Concept Designer & 3D Modeler Bambou Diffusion - France Packaging

Main tasks:

- Development of concept products, such as Coolers and Bottles.
- 3D Modelation
- 3D Product Visualization,
- Photoshop image editing of personalized products.

10/04/2022 – 08/07/2023 Oliveira de Azeméis, Portugal

● 3D modeler PTC Group

Along with the PTC team, I had the privilege of working on different projects, as follows:

- Development of accessories and concepts in Bezier (Single Span) for Renault.
- Development of body concepts (Alias Sub D) for Alpine.
- Technical details, such as the application of fillets in Bezier (Single Span) for Ford.
- Execution of models and changes in Bezier (Single Span) for Stellantis.
- Model development and changes in Bezier (Single Span) for Quantron.
