Status :

Pre settled status
Settled status in october 2025

Young dedicated 3D artist passionate about creating environments for screens. International profile growing up in the UK and Asia. Modeling environments is my strong point, I am also currently self learning aspects of modeling in depth such as animation, texture, lighting, character design and geometry nodes. I understand the need of experienced artists in the domain and am eager to gain such experience to create unique projects that people will remember and enjoy to its fullest. I am excited about more collaborative projects in the work environment to hone new skills !

Work Experience :

July 2024 - Today (part time), VFX / Environment Artist - Contract & R&D Projects. Creation of semi-realistic 3D environments and VFX-oriented scenes focused on lighting, material realism for cinematic shots and asset creation inspired by film and AAA game pipelines to enhance atmosphere and realism for storytelling.

Nov 2023 - Today, Sales Associate and Store operations at Montblanc, ALAIA taking immediate initiatives to deliver clients experience and improve productivity in store operations.

Apr 2023 - Today (part time), Founder of CREATOR, a gaming and online content creation association regrouping 9 team members. Team leader in charge of communication, Event Organiser, Caster, technical support, Internal Communication. Invited to multiple public events and conventions I learned to organize a recording platform, speak to a public with 300+ people to redirect and animate.

January 2024 - April 2024, lead VFX artist, lead editor and lead SFX Short film. Led all VFX for a narrative short film, creating semi-realistic VFX while working with shot based workflows. Led editing and sound design to support narrative whilst working with the Director and the Production team to deliver final film-ready shots.

Education :

2021 - 2024	BA (Hons), (UAL) University of the Arts London in Production and Arts for Screen
2020 - 2021	Foundation Year (UAL) University of the Arts London Art and Design Course
2018 - 2020	The Harbour School (Hong Kong SAR, China), High School
2010 - 2018	Diploma French International School of Hong Kong

Accomplishments :

Most promising designer for Lycée Français International, Couture Fashion Show in HK had to find the proper balance between creativity and ecology to create a dress that I first designed in photoshop.
Guitar learned for 10 years (played in a band for 2 years)
Making dioramas is the reason I discovered 3D modeling, I wanted to do more than just manual models and started learning 3D to combine the physical and digital.
I create video and photo editing through content creation and had to understand different formats, such as previews, announcements and longer contents helping me to understand better what elements are needed depending on the projects.
