

Bio

While at Etesian Green I was lucky enough to work with a small yet inspirational team creating 3d visualisations and designs for Transport and Infrastructure around the country. With projects including Bus Shelters around Worcester to the current Gatwick Airport project. Initiative and dedication was key to keeping the projects of Etesian Green moving forwards and I enjoyed the rewarding process of solving problems in 3d/CGI/Unreal Engine. I would have regular contact with individual team members and full team meetings, both in-person and remote which was enjoyable and productive bouncing ideas around. Whether in a studio environment or working remotely, I find a proactive approach to my role keeps my work ethic thriving and the role interesting.

Recent Experience

April 2025 - Present: Etesian Green / RCG Group - 3d Visualisation / Design :: Visualisations of Mobility Hubs, Bus Shelters and Green Energy Solutions.

Responsibilities;

- The visual development of Mobility Hubs, Bus Shelters and Retail Concession Pods.
- Research and development of future Transport and Infrastructure prospective proposals.
- Keeping up-to-date with the latest in Green Energy Solutions for Transport and Infrastructure.
- Creation of high fidelity models with real-world details to use in Unreal Engine 5 and 3d renderings.
- Creation of Environment Scenes showcasing the company's products for promotional 3d Renders.
- Creating animations for Project Proposals and Presentations.
- Using SketchFab to showcase prospective design proposals.
- Production of 2d Draftwork and Visual Drawings for Installation Design Packs.
- Editing videos for the purpose of presentations and project promotions.
- Keeping up to date with advances in the fields of 3d Modelling/Rendering, UE5 and Blueprints.
- Creating innovative solutions to the growing PropTech industry.

Previous Experience

March 2024 - March 2025: Amutri Ltd - Senior 3d Artist :: Interactive visualisation tool - Developing a low-technical knowledge, web-based visualisation tool to showcase and evaluate designs through interactive experiences.

Responsibilities;

- The development of Amutri, a UE5 based Real-Time Web visualisation tool.
- Creation of a high fidelity model Library to use in Unreal Engine 5 replicating Real-World products.
- Creation of a Material Library using custom Material Shaders and a PBR texture workflow.
- Production of Real-World Lighting Products using a custom Blueprint tool and IES profiles.
- To produce high quality PBR textures to use in UE5 for use in Real-Time environments.
- Developing Blueprints in UE5 to bring about Real-Time and Artist-Tool functionality.
- Develop new ways of working with team members to bring about the creation of Asset Libraries.
- To develop new techniques / workflow with documentation to increase efficiency and visual fidelity.
- Keeping up to date with advances in the fields of 3d Modelling, UE5 and all its features.
- Implementation of new Maxscripts to streamline workflow for efficiency.
- Creating innovative solutions to the growing PropTech industry.

Mar 2018 - Mar 2024: Connected Places Catapult - Mid-Level 3d Artist :: Supporting innovation projects - Seeking to develop and evaluate innovative visualisation Tools. UE5, Unity, Digital Twins, Point Cloud, BIM and VR Development.

Sept 2015 - Mar 2018: Logicom Ltd 3d Artist / Modeller :: Virtual Reality Experience - "Virtual Worlds" Creating High Fidelity Assets for an Interior Design VR experience in Unity. Master Materials Library. UI Design.

Competency

- Confident in understanding and solving problems with creative solutions.
- Comprehensive range of software skill sets with constant development.
- Understanding the industry's pipeline to utilise and develop an effective workflow.
- Meticulous attention to detail in creating photoreal models and textures.
- Competent in retopologizing models to high or low poly budget.
- Texture Creation with RGBA (texture packing) PBR techniques.
- Confident in mechanical animation and rigging.
- An interest in Engineering and Industrial Design.
- Keeping up with the latest industry techniques and software technologies.
- Member of 3d Forums sharing and learning new knowledge and techniques.

Personal Projects

- Creation of Materials and Shaders in different engines, Unreal Engine, Unity 3d and Corona Renderer.
- Ongoing improvement of Rendering with the study of different materials and environments.
- Development and Study of Blueprints in Unreal Engine for the creation of Game-Logic.
- Development and Study of Unreal Engine 5's new features such as PCG, Lumen, Nanite, and Substrate.

Software

3ds Max
Blender
Corona Renderer
Photoshop
Quixel
Substance Painter
Affinity Suite 2
Unreal Engine 5
Unity 3d
Illustrator
DaVinci Resolve
SmartGit
Microsoft Office

Development

SketchUp
UE5 Blueprints
UE5 Game Logic

Portfolio

I have linked some artwork examples in my GoogleDrive Portfolio. If you would like to see more high resolution samples of my work or ask any questions please don't hesitate to contact me.
