JOE NEWSTEAD

Junior Artist

About Me

I'm a 22 year old graduate, eager to embark on my career as a junior artist.

I'm very sociable, and a loyal team member. I've always been a creative, having explored dozens of mediums in my early years. I've always been fascinated by Video Games and animated TV shows, which directly inspired my exploration of 3D modelling.

I love my nerdy hobbies, as well as staying fit and engaging in my local community. My biggest aspiration is to be a part of a team, creating stunning immersive experiences, and getting to hone my skills along the way.

I'll never tire of a job that I'm passionate about, willing to do whatever it takes to make our dreams a reality.
