SOFTWARE

- Blender
- 3ds Max
- Maya
- Substance Painter
- Unreal Engine
- Adobe Creative Suite
- Microsoft Office

SKILLS

- 3D Modelling
- 3D Animation
- Storytelling
- Sculpture
- 2D Drawing
- Technical Drawing
- Painting
- Art Composition
- Anatomy
- Colour Theory

LANGUAGE

- English
- Spanish
- Catalan

I am a 3D generalist with a background in digital media and traditional art, specializing in 3D modelling and product visualization. My work focuses on creating clear, realistic, and visually compelling assets that communicate design, form, and function.

I have experience modelling, texturing, and rendering high-quality products and props using tools such as Blender, 3ds Max, and Substance Painter, with an emphasis on materials, lighting, and detail accuracy.

I bring a considered and detail-oriented approach to every project, whether working independently or collaboratively, and I am committed to continuous skill development and delivering polished, production-ready visuals.

EDUCATION

Edinburgh Napier University (ENU)

BSc (Hons) Digital Media and Interaction Design, Digital Arts
Graduated - 2025

I specialised in 3D Modelling and Animation, as well as Texturing, Lighting and Rendering. I gained experience in the video game development pipeline, from the conceptualisation of a Game Design Document to its subsequent realisation in Unreal Engine 5. Also, I enhanced my skills in Storytelling and problem-solving, teamwork, time management, Agile workflow, STARL System and Project Management.

Universitat Politècnica de València (UPV)

Licentiate degree, Fine/Studio Arts, General
Graduated - 2019

During this degree, I learned both classical and contemporary visual and plastic arts. Exploring and mastering different techniques such as painting, sculpture, drawing, illustration, composition, colour theory, human anatomy, were the main objective of my studies during my time at this university.

EXPERIENCE

Build A Rocket Boy (BARB) - Summer Internship 2024

During this internship, I worked as a Beta Testing and QA, which provided me with:

- Bug Reporting and Documentation
- Level Design and World Building
- Kitbashing
- Environmental Storytelling
- Visual Scripting System
- Independent Project Management

John Crabbie & Company Limited - Bottling operator & Distiller, 2020-2023

Working in a team of three members, and in different shifts, has provided me with:

- Time Management
- Multitasking
- Adaptability
- Team Work
- Attention to Detail
- Problem Solving

EXHIBITION

Scottish Games Frenzy 24 - Exhibitor

- Echoes of Light: First video game developed during BSc studies at ENU, focusing on interactive storytelling, 3D modelling and game development.
- Internship Project: Solo developed game created during internship at BARB, demonstrating independent development and level design skills.
