

Dan Burgess- 3D Environment Artist

daniel.joseph.burgess@gmail.com • 07971679255 • Merseyside, UK
Portfolio:<https://danjburgess.artstation.com>

Personal Profile:

I am a 3D Environment artist with experience building 3D environments and props. In 2017, I graduated from De Montfort University where I studied Game Art Design. I am a highly motivated individual who is able to work both on my own and as part of a team and work with using my own initiative.

Skills:

- 3DS Max
- Blender
- Zbrush
- Speedtree
- Substance Designer
- Substance Painter
- Low/High Environment/Prop Modelling
- PBR Material Creation
- Unreal Engine
- Unity

Employment History:

3D Artist-Skyhook Games (August 2019-September 2024)

Position Held- 3D Artist

Duties

- Modelling/texturing game assets for use in Unreal engine and Unity
- Environment optimization (LODs, making sure texture sizes are appropriate for project)
- Lighting
- Level art in Unreal engine
- PBR material creation in Substance and Photoshop
- Creating speedtree assets for use in Unreal editor

Shipped Titles

- Destruction Allstars
- Lawn Mowing Simulator
- Train Sim World 2 & 3
- Holiday Express Train Sim World DLC
- Marauders
- Bassmaster Fishing

During my time at Skyhook I worked on such projects such as the Train Sim world franchise by Dovetail games, Skyhooks own IP Lawn Mowing Simulator, Team 17's Marauders and Destruction Allstars by Lucid Games. Over the course of that particular project I created a variety of assets ranging from the stadium/arena in the Barcelona map, to vistas just outside of the player environment. This mostly took the form of various skyscrapers and high rise buildings which we placed in engine.

Working on Train Sim World, I created background assets for various environments as well as working on route placement for various DLC's. On an average day 500m² of track was being dressed.

I was also an environment artist working on Marauders by Team17. I was provided with a block out of the level by the client and then took it from a rough level layout to a finished environment, with a full lighting pass over the course of the project.

Education and Qualifications:

Game Art Design- De Monfort University- First Class Honours (2017)
