Professional Summary

Creative Technologist & Digital Learning Technologist with strong experience in Articulate Storyline 360, Rise 360, VR application development, and 3D visualisation. Proven ability to collaborate with academic teams and stakeholders to design innovative, accessible, and engaging learning experiences.

Core Skills

- Articulate Storyline 360 & Rise 360
- VR Application Development
- Immersive Learning Design
- Moodle Administration
- 3D Visualisation
- VR, 3D Printing & Emerging Technologies
- Digital Content Development
- Cross-disciplinary Collaboration

Experience

Digital Learning Technologist | Fife College | 2021 - Present

I am responsible for maintaining the Virtual Learning Environment (Moodle) along with enhancing the student learning experience. I also support enhancing the learning experiences for students by using digital tools and resources using different technologies such as: Articulate Rise, 3D printing, laser engraving & Virtual Reality experiences.

Articulate Storyline 360 & Rise 360

Developed interactive learning content using Articulate Storyline 360 and Rise 360 to support blended and fully online delivery across multiple subject areas, improving accessibility, consistency, and learner engagement in line with Digital Learning Standards. Collaborated with curriculum teams to translate subject matter into engaging digital learning experiences, providing guidance on pedagogy, accessibility, and best practice, and delivered training, workshops, and one-to-one support for staff in the effective use of these tools.

VR, Immersive Learning & 3D

Led and supported VR application development projects for both external clients and internal departmental use, creating immersive learning experiences that deepen subject understanding. Facilitated VR learning sessions aligned to curriculum outcomes and supported staff and learners in the use of Immersive and Innovation Spaces, including VR, 3D printing, and emerging technologies. Produced a 3D flythrough of the new Dunfermline City Campus for marketing, stakeholder engagement, and internal communications, showcasing facilities prior to completion.

Platforms, Systems & Support

Maintained and administered the Virtual Learning Environment (Moodle), ensuring reliable access, usability, and continuous enhancement of the student learning experience. Worked closely with Digital Services and external vendors to test, pilot, and implement new learning technologies, and provided responsive support via the Digital Learning Helpdesk, ensuring timely resolution of technical and pedagogical queries.

Designer | Freelance | 2020 - 2021

Collaborated with indie game developers to create and optimize 3D models for gaming projects, ensuring seamless integration and high performance. My role involved creating & fine-tuning models to meet client technical specifications while maintaining aesthetic quality.

Graphic Designer | C-Mist | 2020

my role was to convey complex technical information in easy to understand training material, maintaining a professional and cohesive brand image while also creating client specific branded material.

Education

BSc(Hons) Creative Computing | Edinburgh Napier University
2018

HND Interactive Media | Edinburgh College
2014 - 2016

Hobbies

Gaming

Gaming & Interactive Media – A long-standing interest in games and interactive experiences, with a focus on how mechanics, user experience, and narrative design shape engagement and learning within digital environments.

3D Modelling & Digital Creation

Regularly creating 3D assets and environments as part of personal projects, using experimentation and iteration to explore visual storytelling, real-time rendering, and emerging creative workflows.

Independent Game Development

Designing and developing my own game in my spare time, bringing together 3D creation, interactive design, and technical problem-solving to build playable worlds and refine skills in real-time engines, UX, and player-focused design.
