## SKILLS AND SOFTWARE

- Zbrush
- Blender
- Substance Suite
  - Material creation in Designer
  - Creating generators in Designer for texturing in Painter
  - PBR texturing
  - Hand painting texturing
- Marmoset
- Unreal Engine /Unity
- Level Art and Dressing
- Source Control
- P4v
- Fork
- Sourcetree (Git)
- Jira / Azure
- SpeedTree
- Adobe Creative Suite

## INDUSTRY EXPERIENCE

### ANCHOR POINT STUDIOS

Mid Environment Artist – 2023 – Current

#### Unannounced IP

As the first Environment Artist hired on the team, I had to work quickly and efficiently in building art for the Prototype. This included asset/prop creation, materials, and large-scale environment building within UE. I was incredibly honoured to help interview potential art team candidates and took great pride in contributing to the warm studio culture. I was also very fortunate to be selected to attend GDC 2023 as a representative of the studio. Some of my duties included:

**Stylised prop/asset creation.** As a team, we created a robust architectural modular kit, terrain kit and vegetation kit using a range of methods, from sculpting and utilising Nanite for non-baked assets to more traditional pipelines such as PBR-painted/baked props. I also created kits of stylised materials for initial art benchmarks, which were displaced in the engine with Nanite.

**Level Art.** Collaborated with level design to create visually appealing levels from their conception, making sure player pathing was clean whilst making impressive vistas and levels to capture the magic of the game.

**Pipeline creation.** Assisted in trialling and developing processes for efficient Environment Art creation at Anchor Point Studios.

**Asset Optimisation and Performance.**

### MEDIATONIC / EPIC GAMES

Junior Environment Artist – 2022 – 2023

#### Fall Guys

**Gameplay Prop Creation.** Designed and developed gameplay props for Fall Guys Creative Mode.

**Team Asset Creation.** Created props and 3D assets for the Animation team.

**Bug Reporting and Resolution.** Identified, reported, and assisted in resolving bugs related to levels and props.

**Texturing.** Textured props using a variety of techniques, including vertex colors, atlas texture sheets, and a combination of baked and non-baked assets.

### MEDIATONIC

Senior Tester – 2020 – 2022

#### Fall Guys

**Test Case Creation.** Developed comprehensive test cases for each level, collaborating closely with the level design team to ensure the intended gameplay experience was accurately captured.

**Playtest Management.** Organized and facilitated playtests, documenting and submitting detailed bug tickets in Azure DevOps.

**Bug Tracking and Analysis.** Monitored and tracked bug reports, analyzing bug and level metrics to identify trends and areas for improvement.

**Art QA.** Collaborated with level artists to conduct thorough art QA, identifying areas within levels requiring refinement and cleanup

### WE MAKE STUFF HAPPEN

Creative Mid Level Visualiser – 2016 – 2020

**Visualizing concepts.** Transforming initial sketches, photo composites, or 3D models into compelling visuals for experiential marketing, events, and PR stunts.

**Client Collaboration.** Worked with world-renowned clients such as Universal Studios, Disney, Pokémon, and PlayStation, creating artwork using supplied assets for their experiential campaigns and exhibition stands.

**Technical Drawing.** Created highly precise 3D build models for the fabrication team.
