PROFILE

3D Artist with previous experience as a **3D Generalist** | **Unreal Engine Artist**, skilled in asset creation, modular design, composition, material development, and set dressing, always following optimized workflows for real-time projects. My main focus and passion lie in cinematic environments for film, episodic content and high-end real-time productions. I'm seeking an opportunity to expand my knowledge in crafting immersive worlds, shading & texturing for film-quality visuals, and developing efficient workflows for next-gen cinematic worlds for film. Supported by a Master's degree in Visual and Applied Arts, I combine traditional art principles with advanced digital techniques to create innovative, visually compelling, and performant environments.

EMPLOYMENT HISTORY

Jan 2024 — Aug 2025

3D Generalist|Unreal Engine Artist, CandyshopVFX

Athens

- Led the creation of a real-time film in Unreal Engine, handling level design, set dressing, camera setup, asset creation, look development animation, and final delivery, while developed and optimized models shaders and materials for diverse scenes, ensuring both aesthetic quality and efficiency in real-time rendering.
- Designed and produced advertising projects, including food content and general campaigns, delivering high quality visuals tailored to client needs.
- Worked across multiple areas of 3D production, demonstrating versatility as a generalist and contributing to both the creative and technical success of the studio.
