Quixelmixer

SUMMARY

Full Stack Game Developer with hands-on experience building end-to-end games, from client-side gameplay to server-side infrastructure and multiplayer systems. Skilled in designing scalable game architectures, crafting immersive and responsive user interfaces, implementing secure networking APIs, and integrating databases for player data, progression, and persistence. Strong problem-solver with deep expertise in game engines (Unity/Unreal), real-time interactions, cross-platform deployment, and delivering complete titles from concept to launch.

WORK EXPERIENCE

Senior 3D Animator

Lead Fusion | Pakistan (Full-Time) | Jan 2026 – Present

- Designed scalable Unreal Engine 3D pipelines, converting briefs to cinematic sequences with MetaHuman creation, Lumen lighting, Cine Camera, postprocessing, Control Rig, and Blueprint/C++ programming for project alignment.
- Built optimized 3D animations and MetaHuman experiences using Sequencer and Niagara, improving storytelling, responsiveness, and immersion on platforms.
- Collaborated with artists and teams to integrate cinematics, MetaHuman assets, Lumen lighting, Cine Camera, postprocessing, Control Rig, and Blueprint scripting for cohesive delivery.
- Created Blueprint/C++ tools for MetaHuman rigging, rendering, Lumen simulations, Cine Camera animations, and postprocessing, boosting efficiency by 20%.
- Optimized workflows by resolving 100+ issues in MetaHuman creation, Lumen lighting, Cine Camera tracking, postprocessing, Control Rig, and Blueprint/C++ for scalable cinematics.

Video Game Instructor

I Teens Lab | Tokyo (Remote, Part-Time) | Mar 2025 – Present

- Developed and delivered engaging Unity lessons—covering editor fundamentals, C# scripting, and gameplay mechanics—to an international cohort of students.
- Designed modular curriculum units and hands-on projects (e.g., mini-game demos) that reinforced core concepts and encouraged creative experimentation.
- Mentored and provided one-on-one support to trial-class students, achieving a 100% session satisfaction rate and a 30% conversion to ongoing enrollments.
- Created interactive assessments and coding challenges, enabling real-time feedback and performance tracking for learners.
- Collaborated with curriculum developers to refine course content, ensuring alignment with industry best practices and emerging Unity features.

Game Developer Facilitator

ICTU Training Solutions | South Africa (Remote, Part-Time) | May 2025

- Developed and delivered industry-aligned game development courses.
- Facilitated hands-on learning sessions with Unity, enabling students to complete real-world projects.
- Mentored over 20 students on individual and team-based projects, providing technical and creative guidance.
- Organized and led events such as game jams and hackathons to promote practical skills development.

Level Designer and Programmer

P1 Virtual Civilization Initiative(4-03-2021, 14-07-2022)

- Designed level layouts, hot spots, and points of interest (POIs) aligned with game themes and lore.
- Iterated levels through production cycles, ensuring readability, difficulty balance, and accessibility for players.
- Documented level progression, layouts, and 3D block-outs for seamless in-engine integration

EDUCATION

BS in Computer Science

Northern University Nowshera,
Pakistan | 2019 – 2023

Alison

3D Game Development with Unity Engine

(Alison, 2020–2022)

LANGUAGES

English (Fluent)

Urdu (Fluent)

CERTIFICATES

Basic to Advanced Python (OpenWeaver, 2021)

Basic to Advanced C# (HackerRank, 2024)
