3D Generalist

Portfolio: <https://animation1071.wixsite.com/joeliggi>

Versatile 3D Generalist, skilled in the 3D production pipeline, from concept and modelling to rigging, animation, and engine integration. Adept at working across artistic styles, collaborating closely with developers and designers to deliver visually engaging assets.

Experience

SD Games - 3D Animator - (October 2023 - Current)

- Rigged and animated key assets (including the main character) in Maya, improving animation workflow efficiency and supporting on-time milestone delivery in a fast-paced indie development environment.
- Contributed to narrative design by co-writing game lore and story arcs, enhancing immersion and strengthening overall game design cohesion alongside the art and gameplay teams.

Freelancer - 3D Animator - (December 2022 - October 2023)

- Delivered 3D animation and rigging services across diverse freelance projects, demonstrating adaptability across artistic styles, pipelines, and team structures.
- Rigged and animated two humanoid characters for XO3D's medical demonstration video, enabling the project to progress to the next stage in its production pipeline.
- Developed modular rigs for props and humanoid characters for A Running Commentary, optimising rig structure for remote collaboration and seamless integration into shared animation files.

Immersive Business - 3D Animator - (February 2022 - June 2022)

- Led 3D animation and rigging for a VR experience. Successfully delivered final animations under a tight schedule, contributing to a seamless user experience in a cross-functional team environment.
- Coordinated with devs and designers to ensure asset integration aligned with performance goals and project milestones.

Skills

- | | |
|--------------------------|-------------------------|
| • 3D Character Animation | • Autodesk Maya |
| • Character Rigging | • Blender |
| • 3D Character Modelling | • Unreal Engine (4 & 5) |
| • Motion Capture | • Unity Engine |
| • Version Control | • DaVinci Resolve |
| • Agile Process | • Spine 2D |

Education

Falmouth University - Game Development: Animation - (2019 - 2022)

- Learned through real-world methods for game development. Working in teams of different fields (designers, artists, and programmers) to build projects within the deadline. All while utilising the Agile Process and Version Control.
- Opportunity to work alongside devs currently in the industry, both for software development and motion capture.
