SUMMARY

I am a recent graduate of Bournemouth University, where I was awarded a First Class Honours degree in Computer Animation Art and Design, specialising in organic and character modelling. I have experience both as an intern and freelance artist at Jason Bruges Studio, where I worked on 3D and 2D projects and adapted to many different workflows. I also had the opportunity to contribute creative ideas in client meetings, which were well received.

After graduating, I completed an intensive character modelling mentorship with Henning Sanden, which significantly strengthened my understanding of anatomy, form, gesture, and appeal. Following the mentorship, I was invited to join Access VFX as a mentor, supporting beginners learning the fundamentals of ZBrush and character modelling.

Alongside my 3D work, I have developed strong communication skills through my role as a Teaching Assistant, supporting children with their classwork in small groups or one-to-one. I also held a singing scholarship at university and served as Secretary of the Performing Arts Society, where I attended meetings and hosted events and presentations.

EDUCATION

Character Modelling Mentorship

Mentorship with Henning

- 📅 08/2025 - 09/2025 📍 Remote
- Went over the fundamentals of character modelling then further looked into gesture and appeal.
