Personal Statement

I'm a 3D environmental artist, who has loved to create and explore expansive and vivid worlds; that I have hand crafted with a keen eye on environmental storytelling. Throughout my years dedicated to the craft, my passion has striven me to get better each day and to never stop learning how to progress. Each day I spend my time improving my environmental art, hard surface modelling and my PBR texturing; in efforts to be able to produce scenes that feel alive and immersive. Through work as freelance and leading design at Hermit Games, I've learnt how to create optimised game-ready assets, and work within real-time constraints. I want to keep growing as an environment artist, learning as much as I can, and contributing to ambitious worlds from sci-fi to dystopian, that help push me to become better every day.

Work Experience

Lead Game Designer

Hermit Games

September 2024 – July 2025

- Designed and iterated on multiple systems to create a fun and engaging gameplay loop.
- Produced high-quality 3D models for a variety of game assets including weapons and environment elements.
- Rigged and fine-tuned animations.
- Created high fidelity models 2-3 a week.
- Developed documentation and time sheets to streamline efficiency.
- Working towards meeting and exceeding targets for delivering viable products and polishing into a refined product.

Freelance 3D Artist

Self-Directed

January 2022 - Present

- Created over 25 stylized and game-ready 3D models, showcasing proficiency in topology, UV unwrapping, and texture baking.
- Published work to Sketchfab and Portfolio with a focus on real-time rendering and optimisation for asset creation.
- Applied PBR workflows and maintained strong poly-budget awareness for use in games.
- Updated and maintained models on recommendations of customers and community feedback through social media use and networking.

Customer Assistant

Vue

September 2025 – Present

- Worked in a fast-paced environment ensuring customer satisfaction.
- Reliably communicated with colleagues while under pressure.
- Developed great time management skills ensuring I got to each customer while also ensuring a clean workspace.

Software

Maya, Blender, ZBrush, Substance Painter, Photoshop, Unreal, Unity, Github.

Skills

Modelling: High to low poly modelling, subdivision modelling, hard surface modelling, sculpting, retopology, UV-Mapping.

Texturing: Procedural and hand painted texture workflows, texture baking, PBR workflows.

Animation: Rigging, weight painting, blend shapes, skinning.

Real time rendering: Optimisation for game engines, LOD creation, poly budget awareness.

Education

University of Hull – Game Design

First Class Bachelor of Arts with Honours in Game Design

Engineering UTC, Northern Lincolnshire

OCR Level 3 Cambridge technical diploma in engineering – MM
