

LUKE BURTON

3D Artist | VR/AR | Unity | Modelling & Animation

+447595875887 lukeburton3d@outlook.com Stafford, UK

EXPERIENCE

3D Artist

Freelance

📅 12/2023 - Present

- Modelled and textured creative low poly assets for a road safety game for Sandwell Council. Produced over 100 unique designs.
- Increased Duvyzat's brand visibility by crafting compelling medical images and animations via Bad Star Studios.
- Converted children's artwork into AR assets to be used in a project displaying the work around Wolverhampton city centre.

3D and VR Designer

Bridge Learning Technologies

📅 11/2022 - 07/2024

- As a 3D and VR designer, I created immersive and realistic VR and AR assets for educational purposes.
- I used my skills in 3D modelling, animation and texturing to design and develop interactive assets to meet the project requirements and objectives. Collaborating effectively with a team of developers and SMEs.

Junior Content Producer

Learn Play Foundation

📅 09/2021 - 11/2022 📍 Wolverhampton

- I completed an apprenticeship in game development, working on various educational projects for different clients.
- I used my skills in 3D modelling, animation, and texturing to create high-quality assets that matched the project specifications and goals.
- Mentored young children the basics of Unity by guiding them through a simple roll-a-ball game.

EDUCATION

BA (Honours) Animation

Staffordshire University

📅 09/2008 - 06/2012

BTEC National Diploma Media Production

Lichfield College

📅 09/2006 - 07/2008

GCSE Grade C

Chase Terrace Technology College

📅 09/2000 - 07/2005

- Maths, English, English Literature, German

SUMMARY

3D Artist with a strong foundation in modelling, PBR texturing, and animation for real-time applications, including virtual reality, augmented reality and web games. I have experience creating optimised, visually engaging assets for interactive and instructional projects, applying attention to detail and problem-solving skills to meet both artistic and technical requirements. Proficient with industry-standard tools such as Maya, Blender, Substance 3D Painter, basic Photoshop, and Unity, I bring strong communication, self-motivated, and organisational abilities, alongside a keen eye for performance and visual quality. To broaden my skill set, I recently completed a 12-week intensive web development bootcamp, gaining hands-on experience with Ruby on Rails, JavaScript, HTML, CSS, and Git. Equipping me with a full-stack oriented perspective and the ability to contribute to both front-end visuals and back-end logic.
