

I'm a 3D artist and motion designer with a multidisciplinary design background based in Manchester, experienced in creating high-quality visual solutions across a wide range of industries and mediums. Over the past decade, I've worked with top-tier brands like Amazon, Coca-Cola, Diageo, Nokia, OnePlus — delivering compelling visual solutions from concept to final execution.

Whether collaborating with agencies, studios or leading full-pipeline deliveries, I bring a proactive, problem-solving mindset, strong communication, and an ability to adapt quickly to new teams and workflows. Always curious and driven by innovation, I enjoy taking on challenges that expand both my technical and creative skill set.

SKILLS

Design - Blending functionality with aesthetics

Texturing - Uv mapping, developing physically based shaders with pre-made textures or custom made using Adobe CC/Substance or Houdini

Modeling - Traditional polymodeling, volume modeling, re-topology of CAD models and procedural modeling

Lighting - Various lighting styles, balancing exposure thorough different shots, optimizing render times

FX - Developing technical and creative solutions in Houdini for physically plausible as well as abstract effects and designs

Animation - Keyframed and procedural animation

HDA development - Creating custom tools for specific purpose or to optimize workflow

Compositing - Multi-pass compositing, color correction, adding post effects for added realism

SOFTWARE

Houdini, Cinema 4d, Redshift, Octane, Substance Painter/Sampler, Adobe Creative Cloud, Nuke

EXPERIENCE

2025
