Neil Hewitson

Realtime technical Artist | CGI designer | Motion graphics + 3D animation

Profile

Technical design leader with a hands-on problem solving approach who enjoys tackling complex creative challenges.

I have proven ability to cut direct to the visual story with the technical ability to maximise project output.

I enjoy co-ordinating layered projects and I have a keen interest in inspiring teams with ideas and solutions.

I am innovative and am driven to explore the newest creative technologies available.

I am adaptive and flexible willing to move within all levels of a pipeline to produce professional grade creative visuals and solutions.

Work Experience

GTV UK | VFX Artist and Motion Graphics Designer - 2D / 3D | Live TV and broadcast
Sept 2024 - Sept 2025

Motorsports motion graphics artist. Lead CGI Artist responsible for creating 3D / 2D motion graphics title sequences for brands such as ITV Auto Mundial, Max Power, King of The Roads, Motorsport Mundial, P1 Power boats and Aqua X TV series.

Lotus UK | Product visualization developer | Sports car and automotive
Jan 2023 - Sept 2024

Developer for 3D digital twins and product asset visualization. Pipeline co-ordinator for CAD ingest and 3D data preparation and optimisation. Incorporating VFX and motion graphics to enhance rendered sequences. Liasing with third party developers and overseeing inhouse project delivery for realtime game engine integration and all technical animations requirements.

VCCP London | Senior CGI Motion Artist | Digital out of home and WebGL
Sept 2021 - December 2022

Developer for AR / VR / XR emmersive content. Building 3D worlds and experiences for UK brands. Clients include - KIA, Inios Grenidier, o2, Virgin, Cadburys and Easy Jet. I was pivotal in the team adoption of 3D game engine technology for both web apps and mobile first CGI content.

Virtual Arts Cambridge | Senior 3D developer | Extended reality solutions
July 2021 - November 2021 (contract)

3D content creation for game engine integration. Developer of high quality asset products for international brands including Ford automotive and Marel processing solutions. Senior creative lead, building virtual experiences in Unity 3D for Webapps / WebGL, Real-time and AR / VR content.

GRCI Group Cambridge | Producer for online digital content | Cyber frameworks
February 2019 - June 2021

Data driven infographics developer in both 3D and 2D. Innovative visual content creation for data dependant visuals. Injecting a new approach to aid end users to easily digest complex graphs, research and analytical information. After effects scripting and batch encoding for multi-platform video deployment.

Gamma Illumination | Lighting artist and 3D motion graphics designer | Product
March 2018 - February 2019

Creating photo realistic renders for product and architectural applications using 3dsmax and Vray. Working in after Effects and Premier Pro to produce 2D and 3D video content with motion graphics for explainer and showcase videos. Artwork for brochures and leaflets using Illustrator and Indesign.

High Street TV | Lead CG motion graphics and product visualizer | Product
February 2015 - 2018

Producing CGI animated sequences for brand awareness content within marketing for TV infomercials. My role was to storyboard motion treatments for team approval and deliver highest quality rendered 3D product animations. Both internal and hard surface beauty shots for brands including Nutribullet, Quadrapan and Abs master.

EPH Creative | Lead 3D designer | TV and Events
February 2012 - 2015

Production artist for super sized replicas within exhibition spaces, adventure parks and events. Working in Zbrush and 3dsmax I created props for film and TV including a 2/3 scale model Aston Martin DB5 and Full size ghostship show stand for high street retailer GAME. I also designed 360 virtual spaces in Unity3D for VR and AR platforms.

Derivco uk / Durban | Design lead | Game development
February 2003 - 2011

Overseeing the graphics department to assure delivery of high quality assets for gaming software. Developing sucessfull multi-platform games with original content including Virtual 3D horse racing, Crazy poker and Premier Roulette. Developing character rigs for integration within Unity3D and game ready assets using 3dsmax and Zbrush.
