

Personal Information

Name	Jose Chahine
Address	Beirut, Bsous, Kamil kassas building, GF
Telephone/Mobile	+96170626964
E-mail	jose.chah@gmail.com
Date of Birth	28/02/1989
Link	https://stamnia.artstation.com/

Education

1992–2007	Bachelor of life and applied sciences Collège des Saints-Cœurs - Hadath
2008–2011	Bachelor computer graphics & animation Notre dame university Loueizeh
2015	I animate Feature film animation 1,2,3
2018	CGMA Realistic character creation
2018	CGMA Stylized character creation
2019	Scott Eaton Face anatomy

Job History

2023–2026	3D Lead & Animator <i>Hybrid Xperience</i> Finding solution and executing throughout different platforms
2024–2026	Instructor <i>Usek University</i> Teaching desgin and multimedia students: “intro to 3D & asset creation” “character creation”
2023–2026	Instructor <i>Alba University</i> Teaching animation and multimedia students: “intro to 3D & asset creation” “character creation” “3D rigging and animation” “Create your first game in UE using BP”
2022–2024	Lead character & animation departments <i>Rekt Studios</i> Created a character creator tool, pipeline for the character department, assets (characters, Hair, accessories, Clothes), Rigging and skinning texturing. Lead a team of animators to create gameplay animations
2021–2022	Lead 3D <i>Growth Technology</i> Led the team to create optimized assets for a web real estate app

Job History

2021–2022	Lead 3D
Company	<i>itXi</i>
	Led the team to create optimized assets for a web digital twin app
2020–2021	Project Manager
Company	<i>Caustik Studios</i>
	Managed the team to produce the first season of Babiloo a 2D animated series for kids (30 episodes)
2018–2025	Co-founder
Company	<i>Drink on the side</i>
	Handling operation management, staff training, internal auditing and inventory management
2015–2023	3D artist to Project Manager
Company	<i>Game cooks</i>
Key Achievements	Asset creation for games, Character creation for games, animator for games, game and level designer, project lead, project manager
2014–2015	3D Architecture visualizer
Company	<i>Burec Construction</i>
	Create realistic Architecture visualization projects
2013–2014	3d Artist and vfx
Company	<i>Profeel</i>
	Motion graphics and vfx artist
2012–2013	3D Artist
Company	<i>Whitebeard</i>
	Created 3D assets, characters and animation for a historical film

	Unity
	Vray, Redshift, arnold, octane
	Advanced skeleton
	Substance (painter, designer)
	Adobe Creative Suite (Photoshop, after effects, InDesign)
	Clickup, ftrack
	Microsoft office (excel, word, ppt)

Date 09/01/2026

To Whom it may concern,

I am writing to express my interest in the position at your company. With over 15 years of experience in the gaming and visual effects industries I am confident that my skills and background align well with your requirements for this role.

Initially I studied Computer graphics and animation where I developed a strong foundation in 3D art, rigging, animation and development. My final research project was to study how to create a 3D character and animate it.

My initial Job was in post-production, where I combined 2D and 3D to produce high quality videos. Then I transitioned to architecture visualization, creating realistic 3D renders before entering the game industry.

In my earlier roles in the game industry I was involved in asset creation for both mobile and pc games, followed by a move to a level design. I was then promoted to develop game ideas and their game design documents which allowed me to lead and manage teams to ensure adherence to the GDD. I led various projects including multiplayer pc game, Vr game and experiences. Additionally I led the team and created the 3D art for an immersive experience at the Burj Khalifa in Dubai, where our project won the competition between 105 studios and was the exclusive VR experience in the Burj for a year.

Following this role, I was the project manager for the kids jingle series 'Babiloo'. In this position I was responsible for finding remote freelancer and hiring, managing, creating pipeline, communicating with client, and delivering 30 episodes using Ftrack for project management.

I then took a role as a game animator for a crypto game where I developed my skills and was able to be promoted to become the character and game animation lead. One of the key challenges we faced was the lack of advanced character creation tools development in the region. I identified the need for the custom tool and the way to create it which allowed users to create their own characters with various body types, clothing options and hairstyles. I led the creation of this tool ensuring it was highly optimized for performance. Additionally I created a streamlined pipeline that automated technical tasks through scripting significantly improving production speed. This solution enabled the team to focus more on the creative aspects while maintaining a high level of quality across all character assets.

Currently, I work as a 3D Technical Lead and animator at a studio specializing in immersive experiences, including projection mapping, VR, AR, and AI-driven holograms. I am responsible for creating high-resolution animated content, 3D characters, assets, interactive environments, and games—some rendered offline and others running in real time for interactive installations. In parallel, I source, manage, and collaborate with talented artists and developers to ensure the successful delivery of high-end projects, while also contributing directly to the creation of realistic real-time and pre-rendered 3D content and environments.

In parallel I teach several university courses in Lebanon, including "3D asset creation", "Character creation", "Rigging and animation", and unreal course that gathers animation and multimedia students so they collaboratively create a game. This teaching experience further sharpens my ability to communicate, organize and simplify complex concepts.

Throughout my career I have been committed to creating efficient pipelines, providing clear and constructive feedback and optimizing processes to ensure timely and high quality deliveries. My experience in leading teams, managing multiple tasks and ensuring adherence to project guidelines aligns perfectly with the responsibilities outline in the job description.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team

Sincerely,

Jose chahine
