PROFILE

CG Generalist with over two years of experience in the gaming industry, specializing in character design, environments, and simulations. Proficient in asset-building pipelines, delivering high-quality, game-ready assets under tight deadlines. Passionate about crafting immersive and visually engaging gaming experiences.

EXPERIENCE

UMX Studio, India — 3D Artist

January 2020 - August 2022

High Poly and Low Poly Modelling: Proficiently create 3D models of various assets, including cars, character outfits, and general objects, with a focus on both high-poly and low-poly versions.

Texturing: Apply realistic and detailed textures to enhance the visual appeal and authenticity of cars, character outfits, and general objects, ensuring they align with the project's requirements.

Character Outfit Simulation: Execute character outfit simulation to ensure natural movement, draping, and realism, enhancing the overall visual quality of characters in the project.

Skinning: Skillfully perform skinning processes on characters and outfits, ensuring seamless movement and articulation.

Rigging: Create complex character and outfit rigs, enabling realistic animations and interactions while adhering to project specifications.

Unwrapping: Proficiently unwrap UV maps for cars, character outfits, and general objects, optimizing texturing and mapping for the best visual result.

Coordination with Seniors: Collaborate effectively with senior team members to understand project goals, receive guidance, and implement feedback to ensure the delivery of high-quality 3D assets

EDUCATION

Middlesex University, London, United Kingdom — Bachelor (Honors) in 3D For Game and Film

Graduated with Upper Second Rank
