 [LinkedIn](#)  London, UK

Summary

Environment Artist / 3D Generalist based in London, UK with over 4 years of professional experience working in the Immersive Experiences sector, with a focus on realistic real-time Game Environment Art.

3D Art Skills

3D Modelling | Modular Kits | UV Mapping | PBR Texturing | Trimsheets | Parametric Materials | Vertex Painting | Lighting | Compositing | Rendering

Software Proficiency

Unreal Engine | Blender | Substance Painter | Photoshop | Affinity | Perforce | Plastic SCM | GitHub | ftrack | ClickUp | Monday

Experience

3D Generalist | Freelance | London | Sep 2021 – Present

- Provided a variety of 3D Modelling, Texturing, Lighting, Animation, Compositing, and Rendering services for clients such as Second Home Studios, Electric Theatre Collective, Hololux, Kinahan's Whiskey, Innovation Esports, Intentionally Designed Solutions, and The Garden.
- Mentored aspiring student on how to use 3D software and how to get hired as a 3D Artist.

Environment Artist | Figment Productions | London | Mar 2023 – Mar 2025

- Built 3D Environments, Parametric Materials, and Niagara Particle Systems using Unreal Engine, Blender, and Substance Painter for interactive projects such as “Legoland NY”, “Minifigure Skyflyer”, “Lego Speedway” as well as various unreleased NDA-bound projects.
- Collaborated with colleagues on projects via. Version Control using GitHub.

Environment Artist | Dominic Harris Studio | London | Feb 2023 – Mar 2023

- Worked on 3D Environments, Niagara Particle Systems, Parametric Materials, and Blueprints using Unreal Engine, and Blender for the real-time, immersive, and interactive artwork project “Endurance: The Polar Studies”.
- Researched real-time collaboration using Multi-User-Editing to improve workflows.
- Collaborated with colleagues on projects with Version Control using Plastic SCM.

Real-Time Designer | Outernet London | London | Jun 2022 – Jan 2023

- Developed real-time content for the world’s largest wrap-around LED displays using Ventuz.
- Upscaled video content using Topaz Video AI and increased frame rate using Flowframes.
- Researched nDisplay for displaying Unreal Engine content in real-time.
- Created script for workflow improvement.
- Collaborated with colleagues on projects with Version Control using Perforce.

Certifications

Unreal Engine 5 – Environment Art for 3D Video Games | Udemy | London | Oct 2025 – Jan 2026

3D Modelling, Modular Kit, Texturing, Trimsheets, Materials, Tessellation, Vertex Painting, Landscape Sculpting, Foliage, Props, Decals, Lighting, Compositing, and Rendering.

Education

3D Modelling, Texturing, and Lighting | Self-taught | London | Dec 2020 – Aug 2021

Learned 3D Modelling, Texturing, and Lighting through structured online courses.
